OF ALL THE  
MATTERS contained in the Seven VOLUMES.

NOTE, That the Numeral Letters denote the Volume; ii signifies the Second Part (in the IVth and Vth Volumes) i, ii, iii, iv, signify the Parts in the VIth and VIIth Volumes, and the Figures signify the Page.

\* Denotes those Pages of the Second Edition which differ from the First Edition of the First Volume, from Page 454.

**A**BDOMEN: tumours of it. VII. iii. 322.  
Hydatides found in it. VII. iii. 525.  
An Abscess in the Liver, III. 81.  
Abys, VI. ii. 2.  
Academy of Sciences, the new Regulation of it, II. 1.  
Acemella, *vide* Ahmella.  
Acoustics, I. 545. \* 457. IV. 396.  
Æquations, *vide* Equations.  
Æthereal Spirit of Wine. VII. iii. 744.  
An aged Woman of 60 Years giving Suck to her Grandchild in Germany, III. 80. The Men-ses till 70 Years of Age, V. 352. A new Set of Teeth after 80 Years of Age, 353.  
The great Age of Henry Jenkins, an Account of it, III. 307, 308. of old Bayles, V. 344. The great Age of several Persons in the North of England, and of two Persons in Ireland, III. 308, 309. in Shropshire, V. ii. 112. in Yorkshire, 115. in New-England, 165. old decrepid Man anatomized, VII. iii. 689.  
Of the Age of MSS. Authors, Printers, &c. V. ii. 1.

The Age of the World to be found by the Encr-ease of the Saltiness of the Sea, V. ii. 216.

Agrestic Observations and Improvements, II. 741 to 749.

Agriculture, of the Improvements of it, II. 748, of the Chinese, V. ii. 175.

The Ahmella from Ceylon, II. 648. IV. ii. 322.

Air, the Compression of it under Water, II. 201, 202. The Calculation of it, 203. Air concealed in the Pores of Liquors, Experiments about it in an exhausted Receiver, 218. Air exhausted out of a Receiver, Experiments about wounded Animals in it, 222. Animals deprived of Air, and drowned, how soon they die, 223, 224. Air rarified, how long Animals accustom'd to it will live, 229, 230. Air unfit for Respiration, though it retain it's Density, 230, 231. Air, the Use of it in Respiration, 231. Air rarified, how soon Animals will sicken and die in it, 235. Air varied as to Density; Experiments about Animals in it, 227. Experiments about the weakened Spring, and some unobserv'd Effects of it, 235 to 239.

Friis

# I N D E X.

- Fresh Air, the Supply of it necessary to Life, III. 66. The Air's Resistance to the Motion of projected Bodies, I. 572, \* 484. Experiments shewing how much the Resistance of the Air retards falling Bodies, IV. ii. 175, 178. The Velocity wherewith the Air rusheth into an exhausted Receiver, I. 585, \* 497. The refractive Force of the lower Air, 228. The Allowances to be made for it's Refraction, VI. i. 167. Greater at some times than at others, VI. ii. 44.
- To estimate the Motion of the Air flowing out of the Lungs in Expiration, IV. 441.
- Air-Bladders, the Use of them in Fishes, II. 845.
- Air-Pump, how to take the exhausted Receiver from it, II. 305.
- Aix, in Provence the Longitude and Latitude of it, I. 655, \* 562.
- Alcali, mixed with a clear sulphureous Spirit of a red Colour, III. 367. Alkaline-Salts, VII. iii. 700, 717, produced by burning rotten Wood, VII. iii. 727.
- Aleanna, it's Nature and Effects, II. 645.
- Alcholles, a particular kind of Food, III. 629.
- Aldebaran, VI. i. 218.
- Aleppo, the Longitude of it, I. 652, \* 564.
- Algebra, Defects in it, I. 117.
- Almon-ac, our Ancestors used to carve the Courses of the Moon of the whole Year, upon a carv'd Stick, which they call'd Almonagh, III. 410.
- Allium-Works describ'd, II. 538 to 541. III. 604.
- Alos Americana describ'd, II. 645.
- An Universal Alphabet, an Essay towards it, III. 373 to 378.
- An Altar to Hercules, V. ii. 47.
- The human Allantois discover'd, V. 309.
- Amber, the Production of it, and an Account of it, II. 473 to 490. a Treatise on it, IV. ii. 279. of it's luminous Quality, 275. a Leaf imprest in it, VI. ii. 323.
- Ambergreis, II. 492.
- Ambergria, VII. iii. 423, 429.
- Amianthus, *sic* Asbestus.
- Amomum, II. 646.
- Amulets, V. ii. 123.
- Anastomoses uncommon; of the spermatic Vessels of a Woman, VII. iii. 553.
- Andromeda, the Nebula in the Girdle of it, J. 251.
- Anatomy, a Course of it, V. 184.
- Anderida, where situated, V. ii. 79.
- An Aneurism of the Aorta, III. 257. VII. iii. 566. two Cases of an Aneurism, V. 334, 335. Observations on them in general, VII. iii. 569.
- Angles; their section, VI. i. 65. The Description of an Instrument for taking them by Reflexions, VI. i. 139. A Trial of the Instrument for taking Angles, VI. i. 428.
- Animals, vomited by Children, and a Man at York, III. 135, 136.
- Animals, of Carnivorous Animals, V. 1 to 9. a new Class of Animals, 177.
- Animal Oeconomy, the Use of the Bile in it, VII. iii. 571.
- Animalecula in Pepper-Water, III. 654 to 656 V. ii. 233.
- Animalecules in the Itch, V. 197.
- Annuities, the Value of them upon Lives, drawn from the Bills of Mortality at Breslaw, III. 669 to 678.
- Of the Ant-Bear, V. ii. 180.
- Antidote to the Poison of Laurel-Water, VI. ii. 374.
- Antient bras Instruments, V. ii. 98 to 108.
- Antient Trumpets, 109.
- Antimony, how to vitrify it with Cawk, II. 555. The Virtue of it, II. 556.
- Antiquities, *sic* Roman.
- Antiquities, several Figures of them, III. 446. in Northumberland, V. ii. 47. French and Irish, 57. in Ireland, 125.
- Anus, Stones voided by it, VII. iii. 520. A Fork put up it, drawn out through the Buttock, VII. iii. 521. Bones of a Fetus voided by it, VII. iii. 557. A preternatural Delivery of one at it, VII. iii. 557, 559.
- Aorta, Aneurisms of it, III. 257. V. 334, 335. VII. iii. 566.
- Apertures of Telescopes, I. 191. of reflecting Telescopes, 200.
- The Aphelia of the Planets directly; how to find it, I. 253, 257, 258.
- Apoplexy, the Dissection of a Lady who died of it, III. 29 to 31. a particular Apoplectic Case, V. 210.
- A strange Appearance near Upsal, II. 199.
- Apple-tree without Blossoms, VI. ii. 344. Molosse made of Apples, VI. ii. 379.
- The Approximation of the Ancients in extracting Roots, I. 98. improv'd, IV. 80.
- Appulses of the Planets to the fixed Stars, determine their Places, VI. i. 170.
- The Aqueduct near Verailles, I. 682, \* 594.
- Araliafrum, a new Genus of Plants, IV. ii. 319.
- Archangel, the Latitude of it, I. 652, \* 564.
- Arches, the true Figure of the strongest, I. 42, 50.
- Arch-work, a peculiar Sort of it, I. 683, \* 595.
- Architecture, I. 676, \* 588.
- Arcutio, VII. iv. 46.
- An Areometer, I. 603, \* 915. VI. i. 326.
- Aries, the first Star of it a double Star, I. 247.
- An Arithmetical Paradox concerning the Chances of Lotteries, III. 679 to 682.
- Arithmetic negative-affirmative; a Summary of it, VI. i. 1.
- Arsenic,

- Arsenic, it's Preparation, V. 420.  
 Arteries and Veins, Tables of them explain'd, V. 328. Spermatic, 329. Ossifications of the Arteries, 341, 344. VII. iii. 571.  
 Arteries Spermatic mistaken for the excretory Ducts of the Glandulae Renales, VII. iii. 541.  
 Arthritic Pains cured by Camphire, VI. ii. 326.  
 The Asbestus, or Amianthus, and the incombustible Cloth made of it, II. 348, &c. IV. ii. 282. Asbestus found in Scotland, 283, 285.  
 Ascites, Observations on a Maid who died of it, III. 140.  
 Ashes, a Shower of them in the Archipelago, II. 143.  
 Ash-tree springing from rotten Wood, ii. 380.  
 An Asthmatic dissected, V. 220.  
 The Astroites describ'd, II. 503, 504, 505.  
 A new Astronomical Instrument, call'd Astro-dictum, I. 216.  
 Astronomical Problems, Conic Sections applied to the Solution of them, I. 62.  
 Astronomical Observations, An. 1711, 1712, at Greenwich, IV. 281. An. 1713, 291. A Collection of Astronomical Observations for 1717, 1718. IV. 329, for 1719, 336. Astronomical Matters in New-England, V. ii. 161.  
 Athens, the Latitude of it, I. 652, \* 564.  
 Atmosphere, the Effects of varying the Weight of it, upon Bodies under Water, II. 204. It's Height at given Altitudes of Mercury, shewn, VI. ii. 30.  
 Attmells, a Lithontripic Plant, *sive* Ahunella.  
 Attraction, a Defence of it, V. 428. The Laws of it, IV. 353. Attraction of Fluids, ii. 255.  
 Avignon, the Longitude of it, I. 650, \* 562.  
 A Bridge at it, I. 681, \* 593.  
 Aurora Borealis, IV. ii. 134, 135, 153, 154, 163, 168. VI. ii. 84, 86, 89, 92, 93, 95, 97, 100, 102, 104, 105, 109, 111, 112, 113, 114, 115, 122. VII. iv. 76, 82, 87, 89, 90.  
 Axis in Peritrochio, Mr Perrault's examined, VI. i. 317, 320.
- B.
- Bahama Islands, natural History of them, VII. iii. 480.  
 Balance, a Proposition on it, VI. i. 306. A mechanical Paradox concerning it, VI. i. 310.  
 Ballasore in India, the Longitude and Latitude of it, I. 656, \* 568.  
 Barbadoes, Observations made there, III. 560.  
 The Jesuit's Bark, an Account of it, IV. ii. 323. It's Effect in stopping Mortifications, VII. iii. 645, 647.  
 Bark of a Tree separated and re-united to it, II. 206.
- Barking of Trees, Observations and Experiments about it, II. 706 to 710.  
 The Barnacle describ'd, II. 849. The Scottish Barnacle, and French Macreule describ'd, II. 850.  
 Barometers, Observations made with them, II. 2 to 9. VII. iv. 71, 86, 90. in Switzerland, IV. ii. 16, at Townley, Upminster and Zurich, IV. ii. 62, 66, 67. The Agreement of them at London and Townley, II. 9, 10. A Barometer that is portable, II. 10. The Divisions of it, 10, 11, 12. Improvements of it, 12, 13. Dr Hooke's Marine Barometer, IV. ii. 4. The Height of the Mercury at the Top of Snowden Hill, II. 13. at the Top of the Monument, 14. at any Elevation above the Surface of the Earth, 14, 15. The several Heights of the Mercury, for computing the several Expansions of the Air, and the Height and Weight of the Atmosphere, 16, 17, 18. An Account of the Ascent of the Quicksilver, 18, 19, 20. and of the different Heights of it in several Weathers and Climates, II. 20, 21, 22. in a Voyage to China, IV. ii. 18. at Chusan in China, 27. The Cause of the Suspension of the Mercury at an unusual Height, II. 23 to 28. The Cause of the Variation of the Barometer, IV. ii. 10. A Statical Barometer, II. 28 to 31. The Use of Barometers, 32. A new one, VI. ii. 28. An extraordinary Height of it, VI. i. 271. VI. ii. 28, 30, 35. It's Height at different Elevations above the Earth, VI. ii. 44. In a Silver-Mine, VI. ii. 48. Middle Height of it observed, VI. ii. 153.  
 Baroscope, a new one, IV. ii. 6. Observations made with it, 9.  
 Bathing-warm, statical Experiments on it, VII. iii. 671.  
 Baths in Somersetshire, II. 336, to 339. in Austria and Hungary, 339 to 344. at Apulum near Padus, 344. at Buxton, VI. ii. 191. VII. iii. 671.  
 Beads of the Druids, V. ii. 121.  
 Beasts, V. ii. 146, 256. in Wales, 216, 218.  
 Bees, Observations about them, II. 722. The Generation of a Sort of them in old Willows, 773, 774. A strange Sort of them in the West-Indies, and an early swarm of them, 775. a new Method of finding out their Hives, VII. iii. 403.  
 A Bee-house used in Scotland, II. 776.  
 Beetles, Swarms of them in Ireland, II. 778. to 782.  
 Bellini, some Account of them, V. ii. 137.  
 Bermudas, Observations made there, and at New-Providence in Virginia, III. 561.  
 Bills, the Use of it in the Animal Oeconomy, VII. iii. 571. Of Persons dead of the Plague, VII. iii. 572.

# I. N. D. E. X.

VII. iii. 595, 600. And of other Diseases, VII.  
iii. 598.

Bills of Mortality in several Places, VII. iv. 46,  
53, 60, 64.

Birdlime, from Elder and Holly, II. 776.

Birds, Migration of them, V. 33. Birds in  
Yorkshire, V. ii. 117. in New-England, 160.  
Strange ones in Wales, V. 33.

Births, VII. iv. 46, 53, 60, 64. The Regular-  
ity of them in both Sexes, V. ii. 240.

Black-Lead, an Account of it, II. 462.

A Tripple-Bladder, V. 284. A schirrous Blad-  
der, &c., III. 147. a small one, VII. iii. 560.

Bleeding, a Strange Kind of it in a Child, III.  
251.

Blindness, Observations made by one who had  
been born blind, and was cured by couching,  
VII. iii. 491.

Bilifer, the Operation of it when it cures a Fe-  
ver, III. 266 to 271.

Blood, the visible Circulation of it, III. 225.  
In the Omentum of a Cat, V. 329, 330. In Tad-  
poles, 331. The Blood-Vessels in the Lungs of a  
Frog injected and viewed with a Microscope, V.  
227. Pleuritic Blood view'd with a Microscope,  
IV. 203. The Quantity of Blood in Men, and  
the Celerity of its Circulation, III. 225. to es-  
timate its Motion, IV. 441, 445. A Method of  
transfusing it, with Considerations and Experi-  
ments of Transfusion, III. 226. The Transfu-  
sion of the Blood of a Calf into a Sheep by the  
Veins only; of the Blood of a Mange into a  
sound Dog; of the Blood of a young into an old  
Dog, and of Calves into Dogs, III. 228. A  
plentiful Transfusion try'd upon a Bitch; of the  
Blood of Weathers into a Horse; of the Blood of  
one Lamb into another; of the Blood of a Lamb  
into a Spaniel, III. 230. Transfusion of Blood  
practised upon a Man in London, 231. The Ef-  
fects of several Liquors mixed with the Blood  
warm from the Veins, III. 232. An Obser-  
vation on Blood grown cold, 235. Effects of the  
Air upon Blood, explain'd by the Change of Co-  
lour, in a clear Liquor on the Admission of Air,  
235 to 239. White Blood found in the Veins,  
III. 339. V. 351. The constituent Parts of hu-  
man Blood, III. 240 to 247. The Opinion of  
the College of Physicians at Romé, concerning  
the Analysis of human Blood, III. 247 to 251.  
Its specific Gravity, V. 320. A Strange Erup-  
tion of Blood, V. 349. A Periodical Evacuation  
of it at the Thumb, V. 351. at the End of the  
Forefinger, and an Eruption of it at the Glandula  
Lachrymatis, III. 252 to 255. Blood passeth  
where Air will not, III. 258. Vomiting of Blood  
cured, VII. iii. 508. Flux of Blood thro' the Pe-  
nis, VII. iii. 539. Its Globules, VII. iii. 562.  
Experiments made with the Blood of a Person  
dead of the Plague, VII. iii. 601.

Blossoms do not presently discover a Blast, II.  
656.

Blue Prussian prepared, VII. iii. 747. Obser-  
vations and Experiments on it, VII. iii. 748.

A Bodkin cut out of the Bladder of a Woman,  
III. 162.

Body of a Man found in a Copper Mine, VI.  
ii. 204. Heights different in the Morning and at  
Night, VII. iii. 680.

A Body long buried, almost wholly converted  
into Hair, III. 13.

Bogs and Loughs improved and drained in Ire-  
land, II. 732. The Inconveniences and Advan-  
tages of them, 733. The Inconveniences reme-  
died by draining, 735. The Motion of a Bog  
in Ireland, 737.

Boiling Liquors, Experiments of their Degrees  
of Heat, VI. ii. 49.

Bones, Observations on them, VII. iii. 672.  
Strange ones dug up near Canterbury, IV. ii. 222,  
227, 233. near Colchester, 245. in New-England,  
V. ii. 159. Human Bones of an extraordinary  
Size near St Albans, V. 387. Bones of Elephants  
under Ground, VI. ii. 205, 211.

The Bones of a Skeleton united without joint-  
ing, or cartilage, with Figures, III. 293.

Bones, of a Fracture of the Neck of the Thigh-  
Bone, V. 388. The Loss of Bones supplied by a  
Callus, 387.

The Bononian Stone, Statues made of it, III.  
346.

Bony Excrencences on a human Skull, with  
Remarks on them, III. 295. Bony Substance  
found in the Thorax, VII. iii. 505.

Books, Accounts of them, Geometria organica  
Colini Maclaurin, VI. i. 108. Rizetti de luminis  
affectionibus, VI. i. 145. Blanchini hesperi &  
phosphori nova phœnomena, 268. Vegetable  
Statics, &c. by Mr. Hales, VI. ii. 157. Weid-  
leri Observationes Meteorologicas & Astronomicas,  
VI. ii. 159. Dominicci Bottoni de immanni Tri-  
nacris motu, &c. VI. ii. 245. Cappeler Pro-  
dromus Crystallographiae, &c. VI. ii. 250. Cal-  
culations and Tables relating to the attractive Vir-  
tue of Load-stones, by the Lord Paisley, VI. ii.  
304. Adversariorum Anatamico-Medico-Chirur-  
gicorum Decas tercia. Auctore Fred. Ruyisch,  
VI. ii. 401. VII. iii. 486, 496, 561, 672, 687,  
752. Martyn Historia Plantarum rariorum, VII.  
ii. 401. Michelotti Conghiettura sopra l'infer-  
mità dell' Animali Bovini, &c. VII. iii. 473.  
Breynil Historia naturalis Cocc Polonici, VII. iii.  
475. Histoire naturelle de la Cochinnelle, VII.  
ii. 477. Catesby's Natural History of Carolina,  
&c. VII. iii. 480. Tuhfat ilkibar, VII. iv. 1.  
Clerk de stylis veterum, &c. VII. iv. 39.  
Borametz, see Scythian Lamb.

- Botanical Invitation to forward a History of the Plants of Switzerland, VI. ii. 380.  
 Boulimia, an Account of it, III. 111.  
 Bowels, the Order of them inverted, III. 111.  
 Hanging out of a Child's Belly, VII. iii. 516.  
 Box-leaves, their Pores, VI. ii. 337.  
 Tycho-Brahe's-Castle, V. ii. 132. vid. Observatory.  
 The Brain depressed into the Hollow of the Vertebrae of the Neck, III. 26. One Hemisphere of it sphaeculated with a Stone in it, 27, 28.  
 Brains of Epileptic Persons, Observations on them, VII. iii. 486.  
 Bramines, Indian, an Account of their Opinions and Worship, V. ii. 165.  
 Brandy French, an Experiment to prove it, examined, VII. iii. 739.  
 Brasil and Congo, Observations there, III. 623.  
 Bras, how to make it, II. 565.  
 Brasil-Root, VI. ii. 328.  
 Bread made of Turnips and Potatoes, II. 630.  
 Tumours in the Breast, V. 216, 218. Breasts of a Woman suddenly excessively swell'd, III. 78, 79.  
 Bridges at St Esprit in France, at Avignon, and at Rome, I. 681, \* 593.  
 A Bridge 70 Foot long, without any Pillar under it, I. 682, \* 594.  
 Bridge-Town in Barbadoes, it's Latitude, I. 658, \* 570.  
 Brocades imitated by Tapestry-Weaving, VI. i. 470.  
 Bronchotome, VII. iii. 496.  
 Brook sinking into the Ground in America, VI. ii. 174.  
 Buenos Aires, Longitude of it, VI. i. 407.  
 Building, Stones fit for it, I. 676 \* 588.  
 Bulbous Plants, flowering much sooner in Water than in the Ground, VI. ii. 355.  
 A Bullet voided by Urine, III. 160. A Bullet in the Head for thirty Years, V. 203.  
 Burials, VII. iv. 46, 53, 60, 64.  
 Burns, cured by Camphire, VI. ii. 326.  
 Burning Coal and shining Wood, III. 646.  
 Burning Mountains in the Molucca Islands, an Account of them, II. 391 to 395.  
 Burning Concaves, I. 211. Experiments on Metals with the Duke of Orleans's Burning-Glass, IV. 190. with Mr Villette's, 198.  
 Buxton-Well, VI. ii. 191.
- C.
- THE Cacao-Tree described, II. 662, 663.  
 Calash, a new Sort of one, I. 592, \* 504.  
 Calendar, a Report upon the Consultation of Mr. Dee's Proposal for reforming it, in 1582, III. 404. Another Proposal for reforming it, III. 405.  
 406. The Conclusion of the Protestant States in Germany, in 1699, for reforming the Calendar, III. 408.  
 Calentures, Histories of them, III. 556. V. 364.  
 A monstrous Calf, II. 899. A Calf with two Heads, II. 899, 900. Monstrous Calves, V. 34, 35.  
 California, a Passage by Land to it, and some Account of it, V. ii. 191.  
 Callus's supplying the Loss of Bones, V. 387. of the Hands and Feet, VII. iii. 480.  
 Calm, a Method for rowing Men of War in one, VI. i. 439.  
 Camphire, VI. ii. 321, 323, 324, 325, 326.

 Canary-Seed, how cultivated, IV. ii. 309.  
 Cancelli, or Soldiers, II. 832.  
 Cancer, a strange one, V. 214.  
 Cantharides, of their internal Use, V. 404.  
 Canton, Longitude of it, I. 657, \* 569.  
 Cap of Lead, an Improvement of the Diving-Bell, VI. i. 350.  
 Cape-Corle, Observations made there, III. 623.  
 Cape of Good Hope, Longitude of it, IV. 451.  
 Some Account of the Place, V. ii. 153.  
 Carolina, natural History of it, VII. iii. 480.  
 Carps, a new Way of catching them, II. 837.  
 Carriages, Advantages of high Wheels to them, I. 591, \* 503.  
 Cartela, where situated, V. ii. 83.  
 Carthagena, Longitude of it, VI. i. 408.  
 Castoreum, the Russian Way of curing it, II. 872.  
 The Catacombs at Rome, III. 448, to 451.  
 Cataracts, Observations on them, VII. iii. 487.  
 Dissection, of one, VII. iii. 488. Two dissected, VII. iii. 489. Substance of one, VII. iii. 490.  
 A Cataract in Gottemburg, II. 325.  
 The Catena, I. 39.  
 Caterpillars, the true Origin of them, II. 739.  
 Catkins, of use to the Fertility of Trees, IV. ii. 143.  
 Catuvillauni, V. ii. 43.  
 Cauk, IV. ii. 192.  
 The Center of Oscillation, IV. 384 to 391.  
 Centripetal Force, the Laws of it, &c. IV. 359, 384.  
 Ceylon, some Account of it, V. ii. 176, to 182.  
 Cesar's Descent upon Britain, the Time and Place of it, III. 412, to 415.  
 Cereus Peruvianus described, VI. ii. 330.  
 Chalcis, the Latitude of it, I. 652, \* 564.  
 Chalk, and other Bodies, not properly Stones, I. 462.  
 A Chalybeat Water at Canterbury, VI. ii. 197.  
 Chameleon, Observations on it, II. 816.  
 Chances,

C

- Chances, a Problem in them solved, V. ii. 255.  
 Ancient Characters, with Remarks on them, III. 530, 531. Unknown Characters at Cannara in Saller, V. ii. 60. in Wales, 120. in New England, 165.  
 The Charges of reflecting Telescopes, I. 200.  
 Cheek-Bone rotten, VII. iii. 494.  
 Cherries recovered, though almost withered, II. 652.  
 Chest, VI. ii. 192.  
 Chichester, a Roman Inscription found there, VII. iv. 23.  
 Chickens, the Manner of hatching them at Cairo, II. 851.  
 A Child 26 Years in the Mother's Belly, taken out of the Uterus, III. 217. A Child crying in the Womb, V. 305. A Child born full of the Small-Pox, 308. An emaciated Child dissected, V. 270. See *Fetus*.  
 Chimney, a Stone one, with a peculiar Sort of Arch-Work, I. 693, \* 595.  
 China Dishes, an Imitation of them, III. 658.  
 China Varnish, how to make, I. 690, \* 602.  
 It's poisonous Quality, V. 417.  
 Chinese chronological Table, VII. iv. 13.  
 The Chinese Way of making Gold Thread, III. 658. Of the Chinese, V. ii. 171.  
 Chirurgical Questions stated, and answered, VII. iii. 536.  
 Chronology Newton's defended, VII. iv. 7, 11. A Table of the Chinese History, VII. iv. 13.  
 Chronological Problems solved, *viz.* to find the Prime, Solar Cycle, and Indiction; what Day of the Week any Day of the Month happens; the Sun's Entrance into any Sign, III. 401, 402.  
 Chusan in China, an Account of it, V. ii. 171.  
 Chyle, the Passage of it to the Breasts, III. 78. The Colour of it, 101, 102. The Distribution of it, 106.  
 Chylification, how made, III. 106, to 110.  
 Chymical Observations and Experiments, III. 351, to 359.  
 The Operations in Chymistry to be solved by Attraction, V. 428.  
 Cider, a new way of improving it by the Cask, II. 656.  
 Cinnamon and Milium described, II. 664.  
 Cinnamon-Trees in Ceylon, V. ii. 180. VI. ii. 321.  
 The Circle squared, I. 15. A Quadratrix to it, described by its equable Evolution, I. 56.  
 Clay, a Table of them, II. 451, 454.  
 Pendulum Clocks, I. 553, \* 465. Keeping Time with the Sun's apparent Motion, IV. 394.  
 A Clock ascendant on an inclined Plain, I. 555,  
 \* 467. The Irregularities of a Clock's Motion avoided, VI. i. 297.  
 Cloth incumbent described, II. 549, to 554. The way of making it, IV. ii. 282.  
 Clouds, their Formation accounted for, VI. ii. 61.  
 A Coalescence of the Vagina Uteri, and notwithstanding that a Woman with Child, III. 216.  
 Coal Mines in Somersetshire, II. 458. Strata in Coal Mines, IV. ii. 260. VI. ii. 222.  
 Coati Mondi of Brasil, VII. iii. 449.  
 Cobalt, V. 420. VI. ii. 236.  
 Coecus Polonicus, VII. iii. 475, 476.  
 Cochineal, II. 784, 785. VII. iii. 477.  
 Cockles in East India, II. 831.  
 The Cecum of a Bitch cut out, and extended with almost liquid Matter, III. 112. Extended with Cherry-Stones, III. 113. The Use of it, III. 114.  
 Coffee, an Account of it, and the Coffee-Shrub, II. 659, to 662.  
 Coffin, a leaden one, in a Roman Burial-Place, V. ii.  
 Cohesion of Lead, VI. i. 325. Of the Parts of Matter; Queries concerning it, VI. ii. 5. Of a Board, and the Surface of Water, VI. ii. 255.  
 Coins, *viz.* Roman.  
 Coins, &c. found under Ground in Lincolnshire, IV. ii. 246, 248. Coins, Welsh, V. ii. 121. Norman, at York, V. ii. 30. Swedish, ibid.  
 Pewter Money coined by the late King James in Ireland, V. ii. 31.  
 Cold, the Effects of it in the Northern Countries, II. 152. Cold produced with Sal Armomiac, II. 161, to 164. Of cold Dissolutions and Fermentations, V. 421.  
 Colic, an unusual one, V. 264. VII. iii. 517. An extraordinary Effect of the Colic, 266.  
 The new Star in Collo Celli, I. 251.  
 A Colliery blown up, IV. ii. 206.  
 Colon, part of it hanging out through a Wound for fourteen Years, VII. iii. 515.  
 Colours and Light, a new Theory of them, I. 128. Experiments of them repeated, I. 173.  
 Colours and Dies, Observations about them, III. 656, to 659.  
 A Description of some simple Colours, I. 689, \* 601.  
 To colour Stone, I. 692, \* 604. To colour Marble, IV. ii. 205.  
 Coloured Arches within the common Rainbow, VI. i. 122.  
 A monstrous Colt, II. 899.  
 Combinations and Alternations improved, IV. 60.  
 Comets,

# I N D E X.

 321. To raise Water by the Help of Quick-  
 silver, VI. i. 352.
- English Channel, a Caution to Seamen bound  
 up in it, I. 673, \* 585.
- English and Paris Weights compared, VII. iv.  
 46.
- Epicycloid, the Quadrature of a Portion of it,  
 I. 31.
- Epicycloids, and Cycloids, a general Proposi-  
 tion for measuring of them, I. 32.
- Epidemical Distempers, Observations on them,  
 III. 271, to 274. VII. iv. 71, 86, 90.
- Epilepsy, Observations on the Brains of Persons  
 who died of it, VII. iii. 486. Strange Epileptic  
 Fits, V. 209.
- Epsom Salt; Observations and Experiments on  
 it, VII. iii. 729, 732.
- The Equality of natural Days refuted, I. 270.
- Affected Equations in Numbers. Improvements  
 in England in the Resolution of them, I. 60.
- Cubic, and Biquadratic Equations, the Con-  
 struction of them, by a Parabola and a Circle,  
 I. 63. The Number of Roots in such Equations,  
 with their Limits and Signs, I. 68. An universal  
 Solution of Cubic and Biquadratic Equations, IV.  
 66. Equations of the 3d, 5th, 7th, 9th, &c.  
 Powers solved, IV. 77. The Method of ap-  
 proximating, in extracting the Roots of Equations  
 in Numbers improved, 80. A Series for expres-  
 sing the Root of any Quadratic Equation, 86.  
 Equations with impossible Roots, VI. i. 9, 19,  
 25.
- An Equation-Table, calculated for the Sun's  
 Place, I. 272. An Equation-Table, calculated  
 for the Days of the Month, I. 636, \* 548.
- The Equinoxes observed, Ann. 1699, I. 280.
- Equalus of the Antients, VII. iv. 31.
- Eridanus, a new Star in it, I. 252.
- The Bridge at St Esprit in France, compared  
 with some other famous Bridges, I. 682, \* 593.
- An Essay-Instrument, I. 604, \* 516.
- Euclid, some of his Propositions demonstrated,  
 from the rest independently, I. 7. Two Porisms  
 of his restored, VI. i. 80.
- Ever-greens, Remedies for them when de-  
 cayed, II. 751. Cautions about exposing of them,  
*ibid.*
- Ewe, Observations on its Fetus and Parts of  
 Generation, VII. iii. 445.

## INDEX.

- F**lery Exhalations, or Damps, II. 181, 182.  
 Nocturnal Exhalations in the Indies, V. ii. 215.  
 The Doctrine of Exhaustions, I. 98.  
 Exotic Diseases propagated by Trade and In-  
 section, III. 274.  
 The different Expansion of several Fluids in  
 Winter and Summer, I. 614, \* 526.  
 Extraction, to raise an infinite Multinomial,  
 I. 90. The Extraction of the Roots of an infinite  
 Equation, I. 93.  
 The Approximation of the Antients, in ex-  
 tracting Roots, I. 98.  
 The Extraction of Roots, without any previous  
 Reduction, I. 81.  
 Eyes, several remarkable Cases relating to them,  
 III. 40, 41. A new Operation on them, with  
 the Instruments used in it, VII. iii. 493. A pro-  
 digious swelling of one, VII. iii. 494.  
 Eyes of Horres, a Blemish peculiar to them,  
 II. 864.
- F.**
- THE Face of a Man differently affected by  
 various Objects, III. 8, 9. Of an unusual  
 Blackness in the Face, V. 196. The Face of a  
 Child six Years old as large as that of a full-grown  
 woman, III. 20, 21.
- Facitious Substances, four sorts of them, III.  
 345, 346.
- Fairy-Circles, an Account of them, II. 182.
- Falling-Sickness, the Cure of it, III. 33.
- Falling Stars; a Method of determining the  
 Longitude of Places, from the Appearances of  
 them, VI. i. 400.
- Farting, an extraordinary Instance of it, VII.  
 iii. 668.
- Fat, its Particles, VII. iii. 468, 469.
- Fermentations cold, V. 421.
- Fever, the use of cold Water in them, VII.  
 iii. 635. Intermittent, how cured, VII. iii.  
 640.
- Faces discharged at an Ulcer in the Groin,  
 III. 119.
- Fibres, muscular of Fish, VII. iii. 431. Of  
 different Animals, VII. iii. 466, 468. The Mem-  
 branes enclosing the Fasciculi of them, VII. iii.  
 464.
- Ficus Indica, V. ii. 181.
- A Fiery Mixture, the Accension and Explosion  
 of it in Vacuo, III. 364. A Comparison between  
 this Fiery Mixture and Gunpowder, III. 365,  
 366.
- Figures of several Parts of the Body designed  
 and explained, II. 809.
- Finlanders, an Account of them, VII. iv. 44.
- Fire, an Eruption of it, II. 385. An Engine  
 for quenching Fire, I. 632, \* 544. Fire subter-  
 raneus, VI. ii. 199.
- Fire-flies, VI. ii. 147.
- Fish, the Eyes of them, and the Structure of  
 the internal Parts of them, II. 847. Their muscular  
 Fibres, VII. iii. 431. A remarkable Skin of a  
 Fish's Stomach, V. ii. 220.
- Fish in Wales, V. ii. 115, 118. In America,  
 VI. ii. 174. The way of Fishing in Chusan,  
 175. A Shower of them in Kent, II. 441.
- Fistula in Perino, of use in the Stone, VII.  
 iii. 536. An extraordinary one, VII. iii. 666.
- Fixed Stars. See Stars.
- An actual Flame, produced by two cold Liquors  
 mixed together, III. 359.
- Flamingo, the natural History and Description  
 of that Bird, V. 63.
- Flanders, observables there, V. ii. 134.
- Fleas, the Generation of them, II. 789.
- Flower, of the Parts and Use of the Flower in  
 Plants, IV. ii. 305.
- Flowers, Geometrical, VI. i. 67.
- Fluids, how to weigh them, I. 603, \* 515.  
 Their Resistance, VI. i. 305. Their Figure, VI.  
 i. 331. Their Existence in the Nerves, VII. iii.  
 585.
- The superficial Figure of Fluids contiguous to  
 other Fluids, their reflective Power, I. 614,  
 \* 526.
- The Flux and Reflux of Euripus, II. 289,  
 290.
- Fluxes, how cured in Scotland, V. ii. 127.  
 The Difficulty of curing them, VII. iii. 641.
- Fluxions, several Instances of the Use of them  
 in the Solution of Geometrical Problems, I. 34.
- Several Attempts to fly, I. 587, \* 499.
- An Engine for Flying, I. 588, \* 500.
- A Flying Hart, II. 782, 783.
- Flies, how to generate them for giving a Tinc-  
 ture, II. 784, 785.
- Flying Grashoppers in Languedoc, II. 788.
- The principal Foci of Optic Glasses, I. 183.
- Convex Glasses of a small Sphere, with their  
 Foci at a great Distance, I. 193.
- Fetus, the Respiration and Nourishment of it  
 in Utens, III. 209, 210. The Fetus of a Sheep,  
 VII. iii. 544. The Fetus of a Bitch receiving no  
 Nourishment at the Mouth, V. 34. A Fetus formed  
 in the Ovarium, III. 212, 213. A Fetus  
 lying without the Uterus in the Belly, III.  
 214, 215, 216. A Fetus in the right Horn of the  
 Uterus, III. 216. A Fetus in the Mother's Bo-  
 dy 46 Years, VII. iii. 544. Extra-Uterine Fetus's, V. 301. VII. iii. 555. A Fetus whose  
 Bones were voided *per Anum*, some Years after  
 Conception, III. 218. A Fetus voided at an  
 ulcerated Navel, III. 219. V. 300. The Bones  
 of a Fetus voided above the Os Pubis, III. 219.  
 Through an Imphume in the Groin, V. 301.  
 By Stool, VII. iii. 557. The Bones of a dead  
 Fetus

Fetus taken out of a Cow's Uterus, V. 54. A preternatural Delivery of a Fetus at the Anus, VII. iii. 557, 559.

Small Fetus's, how to preserve them, III. 650.

Food, a Boy living without it, VII. iii. 668.

Forces of moving Bodies, VI. i. 275, 276, 280,

281, 285, 287, 289, 292, 294.

Fork put up the Anus, and drawn through the Buttock, VII. iii. 521.

Fossil-Shells, in Italy, France, and in several Places in England, as Kent, Berkshire, II. 425 to 428. Remarks on Fossils, IV. ii. 264. Of Reculver-Cliff, IV. ii. 263. Of Harwich-Cliff, 264. In Wales, V. ii. 119, 120. Fossil Shells and Fishes in Lincolnshire, II. 428. The Fossil-tongue of a *Pattinaca Marina*, II. 421. Fossil Teeth and Bones, VI. ii. 211.

Fountain, a remarkable one in Sweden, IV. ii. 187.

Fountains and rivers, the original of them, II. 329. Fountains boiling, and subterraneous Streams, II. 349, 350.

Fowls, Observations on the Head of them, II. 860. The Anus of them applied in malignant Distempers, II. 863. A Pin in the Gizzard of a Fowl, V. 53.

Fracture of the Neck of the Thigh-Bone, an Observation on it, V. 388. A remarkable Fracture of the Skull, V. 202.

Fractions, Algebraic, VI. i. 51. The Sum of infinitely infinite Fractions, I. 104.

A Map of France, I. 659, \* 571.

Observables near Frankfurt on the Oder, III. 603.

Frankfurt on the Maine; Bills of Marriages, Births, and Burials in it, III. 667.

Freezing, Experiments about it, II. 164, 165.

Freezing of Water in Vacuo, VI. ii. 51. Almost instantaneous, VI. ii. 54.

Friction, the great Effects of it, III. 10, 11.

Frictions, of a compound Engine, reduced to Calculation, VI. i. 321. Of Pulleys, VI. i. 322.

Frogs, Observations on their Lungs, II. 817. V. 227.

Frost, in 1684, the Effects of it, II. 153 to 161. Of the great Frost in 1708, IV. ii. 113. In January 1732, VI. ii. 69.

Fruit-Trees, Choice of them, for speedy Propagation and pleasant Liquor, II. 653, 654. An easy way of raising and transplanting them, II. 655, 656.

Fruit, and Flowers, how to make them grow in Winter, and how to keep them a whole Year, II. 750.

Fuller's Earth Pits, VI. ii. 220.

A subterraneous Fungus, II. 458, 459.

## G

Terra del Gado in Madagascar, the Longitude of it, I. 656, \* 568.

Gage to measure any Depth in the Sea, VI. ii. 163.

The Gall Bee, II. 769.

Gall Bladder, the Consequences of a Wound in it, VII. iii. 572.

Gangrene, an Account of a strange one cured, V. 388.

Gardening improved, II. 749.

Generation of Plants, VI. ii. 345. Of Animals, II. 907 to 912. VII. iii. 473. Spontaneous, II. 765. Parts of it in an Ewe, VII. iii. 445. Preternaturally formed in a Woman, VII. iii. 546, 548, 551.

Giant's Causeway in Ireland, II. 511 to 519.

Gibraltar, the Geography of some Roman Towns near it, V. ii. 31.

Ginseng, a Tartarian Plant, V. 314, 319.

Glands, the Structure and Use of them, III. 86 to 88. Two new Glands near the Prostates, with their excretory Ducts, lately discovered, III. 194. External, Maxillary, and Salivary, VII. iii. 459.

Glandula renalis, an excretory Duct from it, VII. iii. 540, 541.

A Bed of Glands found in the Stomach of a Jack, III. 93, 94.

Glandula Miliares described, III. 93.

Glandula Renales, & Uterus, in a Puerpera, V. 290.

A Glandulous Substance found between the Heart and Pericardium of an Ox, III. 69.

Glass, how to paint it in Marble Colours, III. 658.

An exceeding large Globe, I. 216.

A small Celestial Globe of Steel, which keeps equal Pace with the Heavens, I. 216.

Globules of Blood, VII. iii. 562.

Glossopetras described, II. 431.

Glow-Worm, II. 760. VI. ii. 247. The flying Glow-worm described, II. 761.

Gold, how to gild it upon Silver, III. 657.

Gold-Mines in Hungary, II. 585 to 587.

Gold extracted from baser Minerals, VII. iii. 745, 746.

Cape of Good-Hope, the Longitude of it, I. 655, \* 567. IV. 451.

Gout, the Cause of it, VII. iii. 634. Cured by Camphire, VI. ii. 326.

Granaries in London, II. 628. at Zurich, Dantzig, Muscovy, II. 630.

Grantham, a Roman Pavement found there, VII. iv. 29. Oeconomy of the Roman Times, near that Place, VII. iv. 30.

Grapes

# I N D E X.

- Grapes, changing Colour, VI. ii. 340.  
 Gravity, the Effects of it in the Descent of heavy Bodies, and the Motion of Projects, I. 560, \* 472. The Properties of it, I. 561, \* 473. Specific of Solids, a Caution to be used in examining it, VI. i. 327. Of some Bodies, VI. i. 329.  
 Greatrix, the Stroker, Cures done by him, III. ii. 12.  
 Green-Copperas Works, II. 531 to 534.  
 Green Worms in Wales, II. 778.  
 Ground fertilized by Frost, II. 728. by Brine, *ibid.* Improved by Salt and by Sea Sand in Cornwall, II. 728 to 730. An uncommon sinking of it at Lynne in Kent, VI. ii. 203.  
 Hard Gums from Plants, II. 700.  
 Gum Lac, it's luminous Quality, IV. ii. 275.  
 Guns, Experiments determining the Point-blank Distance, the just Charge of Powder, and the best Size of great Guns, I. 581, \* 493.  
 Wind-Guns, I. 584, \* 496.  
 Great Guns, the Force of several Sorts of them, I. 583, \* 495.  
 Gerard, the yellow described, V. 35.  
 Gut, a Piece of a Dog's Gut cut out, and cured, V. 371.

## H.

- H**Acmeles, *vid. Ahmella.*  
 Hail-stones of an extraordinary Bigness, II. 144. Very large in Flanders, extraordinary in Wales and Cheshire, II. 145, 146. A Storm of them in Hertfordshire, in May 1697, II. 147. In Herefordshire and in Monmouthshire, June 1697, II. 148. in Yorkshire, IV. ii. 100.  
 Hair found in several Parts of the Body, III. 24 to 26. in the Uterus and Ovaria of Women, V. 493. Hair found in the Body of a Woman that died in Child-bed, III. 16, 17. A Bunch of Hair voided with the Urine, V. 279, 281.  
 Hair-Worms described, II. 771.  
 Halo's, II. 185. IV. 227. VI. ii. 76. VII. ii. 75, 78, 101. The Causes of them, II. 189 to 194.  
 A Hare dissected, V. 196.  
 Harwick Cliff, an Account of it, IV. ii. 264.  
 Hemorrhages uncommon, V. 348. *vid. Blood.*  
 Hemorrhoid Veins, V. 340.  
 Head, a Bullet in the Head for thirty Years, V. 203.  
 Healing Springs, Observations on them, II. 345 to 349.  
 Hearing, the Organ of it described, III. 43 to 46.  
 Heart, the Motion of it described, III. 69.  
 The Hearts of cold Animals taken out of their Bodies, continue to beat in an exhausted Receiver for an Hour or two, II. 222. Anatomy of the Heart of Land-Tortoises, V. 74. The left Ventricle of the Heart prodigiously distended, V. 229. The Vena Azygos inserted into the right Auricle, &c. V. 231. Of the Force of the Heart, V. 231 to 249.  
 Heats, excessive in Poland, II. 165. The proportional Heat of the Sun in all Latitudes, II. 165 to 169. A Scale of the Degrees of Heat, IV. ii. 1. The Expansion of the Liquor in the Thermometer proportional to the Degree of Heat VI. ii. 49. Experiments on the Degrees of Heat in boiling Liquors, VI. ii. 49.  
 Heights measured by Patrick's Barometer, VI. ii. 28. Of Mountains measured barometrically, VI. ii. 30. Remarks on the Heights of Mountains, VI. ii. 35. Of the Barometer of different Elevations above the Earth, VI. ii. 44. Of the human Body different in the Morning and at Night, VII. iii. 680.  
 St Helens, the Longitude of it, 656, \* 568.  
 Hemlock, the Effects of it described, II. 640. A Root like it that caused Madness, II. 641.  
 Hemlock-Water Dropwort, the fatal Effects of it, II. 641.  
 A Hen with a perfect Chick in the Ovarium, II. 904. A Mountain Hen dissected, V. 196.  
 Herba viva, VI. ii. 360.  
 Herbs of the same Make and Class, have generally the same Virtue, II. 704 to 706.  
 An Hermaphrodite at London and at Thoulouse, III. 306. Hermaphrodite Lobster, VII. iii. 421.  
 Hernia squosa, VII. iii. 561.  
 The Hessian Bellows improved, IV. 447.  
 Hirudinella marina, VII. iii. 418.  
 The Island Hirta, a Description of it, III. 541 to 543.  
 Holland, Remarkables there, V. ii. 134.  
 Hollandia Nova, Observations on it, III. 622.  
 Holt, the Nature and Virtue of it's Waters, VI. ii. 176. Strata found in the Wells there, VI. ii. 225.  
 Honfleur, the Longitude of it, I. 650, \* 562.  
 Horace, a Passage in that Poet explained, IV. 474.  
 Horizon, Celestial Objects appear greater near it, than when higher elevated, I. 221.  
 A Horn hanging at the Neck of an Ox, II. 865 to 869. Horns found under Ground, VI. ii. 224. An extraordinary large Pair, VII. iii. 441. A very large one of the Stag-kind, VII. iii. 449.  
 Horny Excrencences in an Irish Girl, and a Boy in France, III. 12, 13. Horn-like Excrencences on the Fingers, V. 386.  
 Horse, a large Stone taken out of one, VII. iii. 440.

Hot-houses,

- Hot-houses, Indian, described, VII. iii. 669.  
 Hottentots, some Account of them, V. ii. 153.  
 Houses and Hearths, the Number of them in Dublin, III. 665.  
 Human Testimony, the Credibility of it, III. 662 to 665.  
 The Humming-Bird described, II. 854, 855.  
 Hungarian Bolus, II. 457.  
 Hurricanes and Storms, II. 102 to 104. Prognostics of them, II. 105 to 109.  
 Hydatides, in a Sheep's Kidney, V. 54, in a Tumour in the Neck, 214. voided by Stool, 277. with the Urine, 278. found in the Abdomen, VII. iii. 525.  
 An Hydrocephalus described, III. 28, 29.  
 Hydrometer, a new one, VI. i. 326.  
 Hydrophobia, its Symptoms and Cure, III. 276 to 281. *vid. Mad Dog.*  
 Hydrops Ovarii, VII. iii. 544. A Woman Hydropical in the external Tunic of the Uterus, and in the left Testicle, III. 205 to 207.  
 Hygrometer, Variation observed, VI. ii. 153.  
 Hygroscopes described, II. 36 to 42.  
 The Hyperbola squared, I. 10.  
 The Generation of an Hyperbolical Cylindroic, I. 188. Apply'd to the finding of Hyperbolical Optic Glasses, 189.  
 Hypocausta of the Antients, V. ii. 62.

## I.

- THE Jamaica Pepper-Tree, II. 663, 664.  
 Japan, Observations in it, III. 620.  
 Jasmine changing Colour, VI. ii. 340.  
 A Contumacious Jaundice, attended with an odd Cafe in Vision, III. 286.  
 Ice and Snow, how to preserve it, II. 161.  
 Iceland, an Account of it, III. 609. Icy Mountains in Switzerland, V. ii. 152. The Icy Mountain Gletchfer, II. 465.  
 Ichneumon Wasps, and the manner of laying their Eggs in the Bodies of Caterpillars, II. 769, 770.  
 Ignis Fatuus, VI. ii. 147.  
 The Iliac Passion, one that died of it dissected, V. 268.  
 Imagination, the Force of it, III. 222. V. ii. 161.  
 To make the Image of any thing appear in a light Room, I. 206.  
 A Man of a strange imitating Nature, III. 8.  
 Imposthumation in the Liver, VII. iii. 506. In the Stomach, cured VII. iii. 507.  
 Indians, some Account of their mechanic Arts and Physic, V. ii. 182.  
 Infection, an universal Preservative against it, III. 276. Infection of the Small-Pox: a remarkable Influence of it, VII. iii. 621.  
 Infinite Series's, a Discourse on them, IV. 90, 130.  
 The Doctrine of Infinites, I. 98. The Proportion of infinite Quantities, I. 102. Infinitely infinite Fractions, I. 104.  
 Two clear inflammable Liquors, being mixed, give a Carnation Colour, III. 367.  
 Ink used by the Antients, VII. iv. 42.  
 Inoculation of the Small-Pox, VII. iii. 602, 608. In New-England, VII. iii. 601, 617, 621. In South-Wales, VII. iii. 618, 619, 620. Compared with the natural Sort, VII. iii. 609, 611.  
 Inscriptions; an uncommon Inscription on a very great Basis of a Pillar, lately dug up at Rome, explained by Vossius, III. 446, 447. An Etruscan Inscription, III. 448. An Etruscan Inscription on Tages's Statue, V. ii. 58. An Inscription in the Language of the Palmyreni, with Draughts of several Inscriptions and Characters, at Persepolis, III. 526. Inscriptions French and Irish, V. ii. 57. Inscription, Roman, at Chichester, VII. iv. 23.  
 Insects, the Generation of them, II. 759. Swarms of them strange and mischievous in New-England, II. 763. Insects in Spain, V. 10. in the Barks of old Trees, 12. Insect-Husks of the Kermes-Kind, II. 766. An Insect Musk scented, feeding on Henbane, and others Musk-scented, II. 783, 784. One yielding an acid Juice, II. 792. Insects voided thro' the urinary Passage, VII. iii. 539.  
 Interest, the common Computations of it corrected, V. ii. 242.  
 Intestines, the spiral Structure of the Fibres of them, III. 88 to 91. The Intestines in the Cavities of the Thorax, V. 265. The Intestines grown cartilaginous, V. 268.  
 Inundations in Gascoyne, in Ireland, in Yorkshire, and in Mauritius's Island, II. 326 to 330. in Yorkshire, IV. ii. 192. VI. ii. 58. in Ireland, 193.  
 Invitation to form Meteorological Diaries, VI. ii. 122.  
 Ipecacuanha, its different Kinds, VI. ii. 327.  
 Iquetaim, a new Plant from Brasil discovered, IV. ii. 321.  
 Ireland, several things in it common with the West-Indies, III. 544.  
 Iris, one odd-figured, II. 466. Iris contracted, its cure, VII. iii. 493.  
 An Irishman of an extraordinary Size, III. 1.  
 Irish Slate, an Account of it, II. 462.  
 Iron, how to give it a Copper Colour, III. 657. Iron-Works in Gloucestershire, and in Lancashire, II. 558 to 560. Iron, IV. ii. 275. VI. ii. 188.  
 A new Island raised out of the Sea, V. ii. 196

## INDEX.

- to 513. VI. ii. 503. An Account of the recovering the sunken Island in the Humber, IV. ii. 231.  
**O**f an Isthmus between Dover and Calais, IV. II. 222 to 236.  
 Italy, Observations made there, V. ii. 136, 141.  
 Juices of Plants, their Nature and Differences, II. 696. Juices eaking, and not letting go their Whey 698. a Saffron-coloured Juice, 698. Juices fuming, oily and clammy, 701 to 703.  
 The Julian Account not to be changed for the Gregorian, III. 406 to 408.  
 Julian Period, how to find the Year of it demonstrated, III. 398, 400.  
 Jupiter observed, VI. i. 221, 224, 251. A Transit of the Moon above it, Ann. 1671, I. 347. An Occultation of Jupiter, Ann. 1679, I. 353. Ann. 1686, I. 359 to 364. A Transit of the Moon below Jupiter, Ann. 1682. I. 357. An Occultation of a fixed Star by Jupiter, IV. 304, 318. The Phasis of Jupiter, I. 382. The Rotation of Jupiter upon his Axis, I. 382. Places of Jupiter observed, I. 384. The Conjunctions of Saturn and Jupiter, Ann. 1682, and 1688, I. 389. A Table of the mean Conjunctions of Saturn and Jupiter, I. 398. The Shadows of Jupiter's Satellites observed, I. 400. The greatest Elongation of Jupiter's Satellites, I. 401. An Instrument for finding the Distances of Jupiter's Satellites from his Axis, I. 404. A Theory of Jupiter's Satellites, I. 409. Emerions of the first Satellite of Jupiter, 1713, at Rome, IV. 306. A Transit of Jupiter's fourth Satellite over the Disk of the Planet, IV. 307. To find the Longitude of Jupiter's Revolution upon his Axis, I. 645, \* 557. *vid.* Collection of Astronomical Observations, IV. 329, 336. Eclipses of his Satellites. See Eclipse.  
 Ivory, the Texture of it, III. 682.  
 Ivy-Berries, a Shower of them mistaken for Wheat, II. 144.

## K.

- K**epler's Problem solved, IV. 208.  
 A large diseased Kidney, with the deadly Consequences of it described, with Figures, III. 143 to 146. A diseased Kidney, III. 682. An Ulcer in the Kidney, V. 252. Kidneys of Wolves, Worms found in them, VII. iii. 456. Extraordinary Stones in the human Kidneys, VII. iii. 532.  
 Knife, of the Prussian one, swallowed by a Man, V. ii. 133.

## L.

- L**Acetals, an Experiment of powdered Blue puffing them, III. 101, 102. V. 254.

Lakes, the Lake of Geneva described, II. 317 to 320. The Lake Avernas, II. 320. The Lake of Mexico, and some extraordinary Lakes in Scotland, II. 321, 322. Observables in the Lake Vetter in Sweden, IV. ii. 183. Of the Lake Lough-Neah in Ireland, II. 322 to 324. IV. ii. 193. Lakes in Switzerland, VI. ii. 176.

A Lamb suckled by a Wether, II. 869. Two monstrous Lambs, II. 900. Lamb, Scythian, a Dissertation on it, VI. ii. 317.

Two new Lamps described, III. 634. Perpetual Lamps, in Imitation of the Sepulchral Lamps of the Antients, III. 636.

Languages, some Observables of them, III. 379.

Lapides Judaici, II. 505.

Lapis Calaminaria, II. 554.

Laryngotomy, an Argument for the Use of it, III. 61 to 64. VII. iii. 496.

Lateral Operation, 33 Stones cut out of the Bladder by it, VII. iii. Plate xxi. pag. 538.

Latitude of Vera Cruz, VI. i. 177. Of Yale College, VI. i. 414—of New-York, VI. i. 414—of Lisbon, VI. i. 414, 419—of Toulon, VI. i. 421. Observations of Latitude, VI. i. 421.

Helmontian Laudanum described, II. 643, 643.

Laurel-Water, poisonous, VI. ii. 365. An Antidote to it, VI. ii. 374. Experiments concerning its poisonous Quality, VI. ii. 374.

Laywell, an ebbing and flowing Spring, VI. ii. 177.

Lead-Mines in Somersetshire, II. 573. A further Account of them, II. 574, 575. Lead-Mines in Germany, II. 576. In Derbyshire, VI. ii. 192. Ore, of working it, VI. ii. 193. Red, VI. ii. 193. Cohesion of Leaden Balls, VI. i. 325. The poisonous Quality of Lead in Ore, II. 576.

Leaf-Gold, II. 588, 589.

Leaves, their Veins and Arteries, VI. ii. 340. Pores in those of Box, VI. ii. 337.

Leech, the Stomach of it described, II. 819. The Anatomy of it, II. 819 to 821. An extraordinary Leech that torments the Sword-Fish, II. 821. A kind of Sea-Leech, V. 12. VII. iii. 418.

Leprosy, the Pox anciently so called, VII. iii. 652, 663.

Levels, a new Contrivance for taking them, VI. i. 271.

The Libella described, II. 763.

Ligament of the Patella torn, mistaken for a Fracture of the Patella, VII. iii. 678.

Light and Colours, a new Theory of them, I. 128. Experiments on them repeated, IV. 173.

The progressive Motion of Light, I. 409, 410, 422. The different Refrangibility of it, VI. i. 145. The Affections of it, VI. i. 145. Its Velocity and equable Motion, VI. i. 149.

A Glade

- A Glade of Light in the Heavens, IV. ii. 133.  
 Lights in the Air, &c. IV. ii. 139, 153. in the  
 Wakes of Ships in the Sea, V. ii. 213.  
 Lightning, it's Effects, VI. ii. 70, 71, 72, 73,  
 74. See Thunder.  
 Lincolnshire, Antiquities found under Ground  
 there, VII. iv. 22.  
 Linnen-Cloth, a new Engine to make it, I.  
 501.  
 Lisbon, Latitude of it, VI. i. 414, 419. Lon-  
 gitude, VI. i. 410, 412, 413.  
 Lithostrata of the Antients, V. ii. 69.  
 A Liver appearing glandulous to the Eye, III.  
 83. An Impostumation of it, VII. iii. 506.  
 Livorne, an Account of it, III. 461.  
 A Loadstone found in Devonshire, II. 601. The  
 attractive Virtue of Loadstones, VI. ii. 304.  
 Lobster, Hermaphrodite, dissected, VII. iii.  
 421.  
 Log, a Comparison between it and an Instru-  
 ment called the Marine Surveyor, VI. i. 444,  
 456.  
 Logarithms, the Construction of them from the  
 Hyperbols, I. 10. from the Catena, 1. 46. The  
 Construction of Logarithms by a Series of Propor-  
 tionals, I. 110. A new way of computing Loga-  
 rithms, IV. 87. A general Method of making  
 them, IV. 156. A new Method, 160.  
 Loins of a Child, a remarkable Tumour on  
 them, VII. iii. 560.  
 London and Paris, their Magnitude compared;  
 VI. i. 426. Their Longitude, VI. i. 410.  
 Longævity, and the Causes of natural Death,  
 III. 309, 310. Instances of Long-life in Shrop-  
 shire, V. ii. 114. in New-England, 165. in Staff-  
 ordshire and Hertfordshire, VII. iii. 689.  
 Longitude, Instructions for finding it by Pen-  
 dulum-Watches, I. 635, \* 547. Experimented,  
 643, \* 555. To find the Longitude by the  
 Moon's Places, I. 644, \* 556. by Lunar Occulta-  
 tions, 645, \* 557. by the Revolution of Jupiter  
 on his Axis, *Ibid.* by Satellite Eclipses, *Ibid.*  
 by Lunar Eclipses, I. 300. Observations of the  
 Occultations of the fixt Stars by the Moon, use-  
 ful for finding the Longitude, IV. 298. of Places  
 determined by falling Stars, VI. i. 400. a Proposal  
 of a Method for finding it within twenty Leagues,  
 VI. i. 401.  
 The Longitude of Lyons, I. 650, \* 562. of  
 Lisbon, *ibid.* of Leipsic, 652, \* 564. of Cam-  
 bridge in New England, IV. 451. of the Cape of  
 Good Hope, I. 655, \* 567. IV. 451. of the Ma-  
 gellan Streights, IV. 453. of Lima in Peru, IV.  
 339. of the Island Virgo Gorda, *ibid.* of Nurem-  
 burg, *ibid.* of Port-Royal in Jamaica, VI. i. 190.  
 of Buenos Aires, VI. i. 407. of Carthagena, VI.  
 i. 408. of the Fort of New-York, VI. i. 409.  
 of Lisbon, Paris, and London, VI. i. 410. of  
 Lisbon and New-York Fort, from Wanstead and  
 London, VI. i. 412. of Toulon and Lisbon,  
 VI. i. 413. of Lisbon, VI. i. 413. of divers  
 Places, VI. i. 414. of Vera Cruz, VI. i. 177.  
 Yale-College, VI. i. 414.  
 A Globe Looking-Glass, I. 214.  
 Loughs and Turloughs improved, II. 736.  
 Lumbrici Latæ & Cucurbitini, III. 119, 120.  
 Lumbrici Cucurbitini, found in the Kidneys of a  
 Dog, 120. Lumbricus Latus & Teres, Observa-  
 tions upon them with Figures, 121 to 132. Lum-  
 brici Teretes found in an ulcerated Ankle, 132.  
 Lumbricus Hydropicus described, with Figures,  
 133, 134.  
 Luminous Appearance in the Air at Dublin,  
 VI. ii. 81.  
 Lungs, the Structure of them, III. 64, 65. A  
 Polypus of them described, 68. An Apopha-  
 tination of the Lungs cured, V. 221, 225. Lungs,  
 proved not to divide and expand the Blood, but  
 cool and condense it, VII. iii. 500.  
 A new Luni-Solar Year, and a perpetual Al-  
 manack, III. 409.  
 Hippocrate's Lunula, the Quadrature of it's  
 Parts, I. 27. The Dimension of Solids generated  
 by the Conversion of the Lunula, 29.  
 Lymphatic Vessels, III. 262, 263. VII. iii.  
 461.  
 The Lyre of the Greeks and Romans, IV.  
 474.

## M.

- Mackenboy described, II. 644.  
 The Macreuse described, II. 850.  
 The Western Shore of Madagascar, the Longi-  
 tude of it, I. 656, \* 568.  
 Mad-Dog, Children bit by it, III. 281, 282.  
 Other Accounts of the Bites of Mad-Dogs, III.  
 527. V. 366 to 369. Of the Bite of a Mad-Pox,  
 V. 369. Cures for Mad-Dogs, or any that are  
 bit by them, III. 283. Receipts and Cures for  
 the Bite of a Mad-Dog, III. 283 to 285. *Vid.* Hy-  
 drophobia.  
 Madness, cured by Camphire, VII. iii. 632.  
 Madras Mortar, how made, VI. i. 465.  
 Madrid, the Latitude of it, I. 650, \* 562.  
 Maggots, an odd Sort of them, II. 763.  
 The Magic Lanthorn, I. 206.  
 Magnetical Observations, II. 601. VII. iv. 71,  
 86, 90. Magnetical Experiments, IV. ii. 296,  
 298. VI. ii. 253, 260. Of the Law of the Mag-  
 netical Attraction, IV. ii. 295, 297. Magnetical  
 Power, VI. ii. 255. Needle, an unusual Agita-  
 tion in it, VI. ii. 304.  
 Magnetical Variations, II. 607 to 610. IV.  
 455, 456. VI. i. 410. ii. 285, 286. VII. iv. 102.  
 Magnetical Variations predicted, II. 610. A  
 Theory of them, II. 610 to 620.  
 Magnetism,

- Magnetism, acquired by Iron standing long in the same Posture, VI. ii. 377. Produced without the Help of a Loadstone, VI. ii. 278.
- Maine, the Culture and Improvement of it, II. 630 to 635. Considered, II. 635.
- Different Maladies, several Observations on them, III. 288 to 290.
- Males and Females, of their Equality, V. ii. 240.
- Malt, how to make it, II. 637, 638.
- Mam-tor, an Account of it, VI. ii. 190.
- Man, whether naturally carnivorous, V. i to 9. old and decrepid, anatomized, VII. iii. 689.
- Maniacal Disorders cured by Camphire, VII. iii. 635.
- The Mantegger described, V. 182.
- Manna in Italy, V. ii. 142.
- The Manuring of Land by Sea-Shells in Ireland, IV. ii. 298. by Sea-Sand in Devonshire, 301.
- Manuscripts, how to judge of the Age of them, V. ii. 1. Of a Physic Manuscript at Florence, V. ii. 140. Welch MSS. V. ii. 118.
- Maple-tree, Sugar made of its Juice, VI. ii. 379.
- Maps, a new kind of them in Bass Relievo, I. 690, \* 603.
- Marble, how to colour it, I. 693, \* 604. IV. ii. 205. A Quarry of Marble in Ireland, IV. ii. 206.
- Marek, old, middle, and lower; Marriages, Births, and Burials in them, III. 668.
- Marine-Surveyor, an Account of it, VI. i. 444, 456.
- Marl-Pits, the Strata in them, VI. ii. 224.
- Marling, Improvement of Ground by it in Suffolk, II. 731.
- Marmot dissected, VII. iii. 452.
- Marriages, VII. iv. 46, 53, 60, 64.
- Mars, the Parallax of Mars, I. 265, \* 424. An Occultation of Mars by the Moon, I. 350. VI. i. 251, 252. A Transit of the Moon below Mars, Ann. 1682, I. 357. The Phases and Rotations of Mars, I. 423. Places of Mars observed, I. 424. A Transit of Mars near a fixt Star, IV. 305. *vid.* Collection of Astronomical Observations, IV. 329, 336.
- Maryland, an Account of it, III. 600.
- Mathematics, a general Scheme for the Advancement of them, I. 1.
- A Woman with a double Matrix, III. 205.
- Matter, Queries concerning the Cohesion of its Parts, VI. ii. 5.
- The Maxima and Minima occurring in the Motions of the heavenly Bodies, IV. 219. The Maxima and Minima applied to Tangents, IV. 7.
- May-Dew, Observations upon it, II. 141, 142.
- Medical Observations in the North Countries, III. 606 to 609. In Scotland, V. ii. 137.
- Medicines, their Operation, VII. iii. 586.
- Melons, how to be ordered, II. 638 to 640.
- The speedy Propagation of Mouldiness in a Melon, IV. ii. 308.
- Memory, the Strength of it, III. 661.
- The Menses till seventy Years of Age, V. 352.
- Menstrua, why Bodies swim that are dissolved in such as are specifically lighter, I. 623, \* 535.
- The visible Conjunctions of Mercury with the Sun, I. 427. Mercury observed in the Sun, Ann. 1690, I. 426. Ann. 1697, I. 427. his mean Motion and Nodes, determined by a Transit, VI. i. 253. Observed, VI. i. 258.
- Mercury found in Plants, II. 580. The Incandescence of it with Gold, 580 to 583. The Use of it in separating Silver from the Ore, II. 589 to 591.
- Dog-Mercury, the mischievous Effects of it, II. 640.
- Meridian Line, the true Division of it, by a Collection of Secants, I. 660, \* 572. The Analogy of the Logarithmic Tangents with the true Meridian Line, I. 664, \* 576. Demonstrated, 665 \* 577. A new brk Meridian propos'd, I. 634, \* 546. A supposed Alteration of the Meridian Line, I. 265. A new way of drawing a Meridian-Line, IV. 461, 462. The Nautical Meridian-Line mechanically divided, IV. 456. Of a Meridian-Line drawn through France, IV. 468. Of an Instrument to find the Meridian, IV. 464.
- Metal, how to make it run smooth and close, II. 557. Experiments on Metals with a Burning-Glaiss, IV. 190. Observations towards a natural History of them, VI. ii. 185, 189.
- An unusual Meteor, II. 200. An Account of several Meteors, IV. ii. 131 to 168. A fiery Meteor in Jamaica, IV. ii. 131. Meteor at Dublin, VI. ii. 81. A great one at Cambridge, VI. ii. 82. A Method for composing a natural History of them, VI. ii. 125.
- Meteorological Diaries, VI. ii. 122. Observations VI. ii. 131, 139. VII. iv. 71, 86, 90. An Account of a Book, VI. ii. 159.
- A Mexican Musk-Hog, II. 873 to 880.
- Mexico, Observations on it, III. 564.
- Micrometers, I. 218 to 220. How to use the Micrometer in Solar Observations, IV. 230.
- Microscopes of several Inventions, I. 207. A Water-Microscope, I. 209. Microscopes improved by illuminating the Objects with uncompounded Light, I. 210. Reflecting Microscopes, I. 210. A Pocket Microscope, IV. 199. The way of making Microscopes, IV. 203. Remarks on Microscopes, V. ii. 238. An Account of Mr Leeuwenhoek's, VI. i. 129.

A Mi.

- A Microscopical Animal discovered, III. 650.  
 Microscopical Observations, III. 650 to 653.  
 IV. 200 V. ii. 220 to 240. Microscopical Animals observed, III. 653, 654. Microscopical Observations, on the Particles and Structure of Diamonds, VI. ii. 226. On the Seeds of Plants, VI. ii. 334. On the Vessels in Grey-Peaſe, VI. ii. 335. On the Vessels of Wood, VI. ii. 336. On the Pores of the Leaves of Box, and of the Down of Peaches and Quinces, VI. ii. 337. On muscular Fibres of Fish, VII. iii. 431. On a Fœtus and Parts of Generation of a Sheep, VII. iii. 445. On the Membranes inclosing the Fasciculi of Fibres into which a Muscle is divided, VII. iii. 464. On the muscular Fibres, VII. iii. 466, 468. On the Particles of Fat, VII. iii. 468, 469. On the Generation of Animals, VII. iii. 473. On the Callus of the Hands and Feet, VII. iii. 480. On the Globules of Blood, VII. iii. 562. On the Globules in the Lees of Wine, VII. iii. 563. On the Bones and Perioſteum, VII. iii. 672. On the Structure of the Diaphragm, VII. iii. 683.  
 Mills, Horizontal Sails for them, I. 587, \* 498.  
 Mineral-Maps, II. 450, 451.  
 Mineral Springs about Paderborne in Germany, and at Basil, II. 331, 332. Near Yeoville in Somersetshire; on the Malverne in Herefordshire; at Faringdon in Dorfshire; in the Bishopric of Durham; in Glamorganshire; at Eglingham in Northumberland, II. 332, 333; at St Amand near Tournay, 334, 335.  
 Mineral-Waters, *vid. Chalybeat, Pyrmont, Spaw.*  
 Mineral-Waters in Jamaica, II. 344, 345.  
 A Mineral-Balsam in Alſatia and Italy, II. 460, 461. A Mineral-Juice, II. 459.  
 A Mineral at Liege, yielding Brimstone and Vitriol, II. 530.  
 Certain Mineral-Glebes, their Efflorescence, II. 548.  
 Mines, Air in them, II. 372. How to make Work in Mines without Air Shafts, *ibid.* Damps in them, 373 to 382. The Strata in Coal-Mines in Mendip-Hills, IV. ii. 260. Mines in Wales, V. ii. 119. Observations towards a natural History of Mines, VI. ii. 185, 187. To draw Damps out of them, VI. ii. 193.  
 Miscellaneous Experiments, III. 656, 657.  
 A sort of Mistletoe in Jamaica, II. 669 to 672. Miffelto, it's Propagation, VI. ii. 348. A germinating Principle in it's Seeds, VI. ii. 351. It's Difference of Sex, VI. ii. 351.  
 Mock Suns, VI. ii. 75, 76, 77, 79.  
 The Modulations of the Voice, a Conjecture about them, III. 61.  
 Moldiness, of it's speedy Propagation in a Melon, IV. ii. 308.  
 Molasses made of Apples, VII. iii. 379.  
 Molucca-Beans found in Scotland, III. 540.
- Monochord, the true Division of it, I. 698, \* 610.  
 A Monſtrous Birth like a Monkey, III. 301.  
 A Monſtrous Boy and Child described, III. 304.  
 A Monſtrous Birth, V. 304. Monſtrous Calves, V. 34, 35.  
 Monſtrous double Birth in Lorrain, VII. iii. 688.  
 An antient Monument at Foultham in Norfolk, III. 436.  
 Moon, Diameters of it, I. 217. how to measure the Moon's Parallax, *ibid.* to find the Longitude by the Moon's Occultation of the Fixt Stars, I. 645, \* 557. IV. 298.  
 Moon eclipsed. See Eclipse; the Spot Plato observed, VI. i. 220.  
 Changes likely to be discovered in the Moon, I. 298.  
 To find the Parallax of the Moon, I. 300.  
 A Transit of the Moon above Venus, Ann. 1670, I. 347. An Occultation of Saturn by the Moon, Ann. 1678, I. 353. A Transit of the Moon above Jupiter, Ann. 1671, I. 347. Ann. 1676, I. 350. An Occultation of the Pleiades by the Moon, Ann. 1672, I. 348.  
 A Transit of the Moon near the Northern Horn of Taurus, Ann. 1672, I. 349.  
 An Occultation of a Fixed Star in Leo by the Moon, Ann. 1679, I. 353, Ann. 1686, I. 359, 364.  
 Occultations of the Bull's Eye by the Moon, Ann. 1610, I. 355. Ann. 1681, I. 356.  
 A Transit of the Moon below the three superior Planets, and Regulus, Ann. 1682, I. 357.  
 Occultations of Regulus by the Moon, Ann. 1683, I. 357, 389.  
 Occultation of two Stars in Taurus by the Moon, Ann. 1683, I. 358.  
 Occultation of a Star in Cancer by the Moon, Ann. 1683, I. 359.  
 Occultation of Saturn by the Moon, Ann. 1687, I. 365.  
 Occultation of Jupiter by the Moon, Ann. 1715, IV. 303.  
 Occultation of a Fixed Star by the Moon, IV. 302.  
 Observations on the Moon, &c. IV. 332, 388.  
 Moose-Deer, in America, described, VII. iii. 447.  
 The general Bills of Mortality at London, III. 665.  
 Bills of Mortality in several Places, VII. iv. 46, 53, 60, 64.  
 Mortar at Madras, how made, VI. i. 463.  
 Of a Mortification, V. 337.  
 Mortification, the Effect of the Bark in putting a Stop to it, VII. iii. 645, 647. Causing the Loss of the Scapula, and Os Humeri, VII. iii. 675.  
 A Molting

## INDEX.

- A Mosaic Work at Leicester, V. ii. 63. another in Sussex, *ibid.*
- Mosco, the Longitude and Latitude of it, I. 652, \* 564.
- Of the Moles in Scotland, IV. ii. 253, 260.
- The Motion of a stretched String, IV. 391.
- Motion parabolical of Projectiles, VI. i. 299.
- Motion, the Air's Resistance to it, I. 572, \* 484.
- The general Law's of Motion, I. 545, \* 457.
- perpetual, Remarks on it, VI. i. 323. Of running Waters, VI. i. 341. A new one discovered in the fixed Stars, VI. i. 149.
- Moving Bodies, their Force, VI. i. 275, 276, 280, 281, 285, 287, 289, 292, 294.
- Mountains, their Heights measured barometrically, VI. ii. 30. Remarks on their Heights, VI. ii. 35.
- Mulberry-Trees, an unusual way of propagating them in Virginia, for the Silk-Work, II. 653.
- To raise an infinite Multinomial, I. 90.
- A Murrain in Switzerland, and it's Cure, II. 869, 870.
- Mus Alpinus, or Marmot, dissected, VII. iii. 452.
- Musa; Remarks on a Family of Plants so called, VI. ii. 361.
- Muscadine-Wine, the way of making it, II. 657.
- The Musca Lupus in Virginia, II. 786.
- The Muscles and Joints, Mr Clarke the Posture-Master had an absolute Command of them, III. 297, 298.
- Muscles, Observations on their Texture, V. 390, 392.
- Muscular Fibres of Fish, VII. iii. 431. The Membranes enclosing the Fasciculi of them, VII. iii. 464. Of different Animals, VII. iii. 466, 468.

- Objects, a partial Sight of one, VII. iii. 490.]  
 Several Observables in Lincolnshire, III. 533  
 to 537. at Chester 537.  
 Observatory at Paris, a deep Cave in it, II. 2.  
 The Situation of the Observatory of Tycho Brahe,  
 I. 216. V. ii. 132.  
 Observations made by a young Gentleman born  
 blind, VII. iii. 491.  
 Occultation of Mars by the Moon, VI. i. 251,  
 252. Of Venus by the Moon, VI. i. 252. *Sæ* Moon.  
 Oeconomy, Animals; the Use of the Bile in  
 it, VII. iii. 571. Of the Roman Times near  
 Grantham, VII. iv. 36.  
 Oil essential, extracted by the *Aether*, VII. iii. 476.  
 Old, decrepid Man, anatomized, VII. iii. 689.  
 An Old Earthen Vessel found near York, III.  
 419.  
 Omentum, a great one, VII. iii. 518.  
 Opal, how to counterfeit it, III. 658.  
 Operation of Medicines, VII. iii. 586.  
 Opium, the Use of it among the Turks, II.  
 643, 644. Of Opium, III. 558. A large Quan-  
 tity of Opium taken without procuring Sleep, V.  
 357.  
 Opossum, the Anatomy of a Female one with  
 Figures, II. 881 to 898. A Male Opossum dis-  
 sected, V. 169. Observations on the Opossum,  
 V. 177.  
 An Optical Experiment, wherein a Needle ap-  
 pears inverted, when applied to the Eye, before a  
 small Hole in a Paper, I. 172. Optical Experi-  
 ments, VI. i. 110.  
 An Optical Problem of Alhazen solved several  
 Ways, I. 172.  
 To find the principal Foci of Optic-Glasses uni-  
 versally, I. 183.  
 To grind Hyperbolical Optic-Glass, I. 189.  
 Optic-Glasses of small Spheres, collecting the  
 Rays at a great Distance, I. 193. Optic Lens's  
 of Rock-Crystal, I. 195. Optic Lens's of Water,  
*ibid.*  
 The Advantages of Reflection in Optic Instru-  
 ments, I. 196.  
 Optic-Glasses ground by a Turn-Lathe, I. 215.  
 on a Plane, *ibid.*  
 Optics, a Spherico-Catoptric Theorem, IV.  
 184.  
 Orange-Trees, how to keep them in Winter  
 without Fire, II. 658.  
 Orange-Trees at Florence, bearing Fruit, which  
 is Citron on one Side, and Orange on the other,  
 II. 658, 659.  
 Organ, it's Imperfection, I. 700, \* 612.  
 An Os Frontis in the Medicine-School at Ley-  
 den, prodigiously large, with Figures, III. 2  
 to 8.  
 Os Humeri, falling off from a Mortification,  
 VII. iii. 675.
- Ossification of the crural Artery, VII. iii. 571.  
 Osteocolla about Frankfurt on the Oder, II.  
 461.  
 Ostracites, the Virtues of them, II. 503 to  
 507.  
 Ostrich dissected, II. 857. VII. iii. 435, 437.  
 Ova found in a Cow, II. 904. Ova after a  
 second Conception, dispersed in the Abdomen of  
 a Bitch, though the Cornua Uteri were filled with  
 the Bones and Flesh of a former Conception,  
 II. 904 to 907.  
 Ovary, Arteries going to it, VII. iii. 541. A  
 Dropsey cured in it, VII. iii. 544.  
 Oxford, the Longitude of it, I. 648, \* 560.  
 Ox, the Stomach of it, VII. iii. 441. An ex-  
 traordinary Fossil Skull of one, with the Cores of  
 the Horns, VII. iv. 101.  
 Oxyoides, a new Family of Plants described,  
 VI. ii. 357. A Remark on it, VI. ii. 360..  
 Oysters, a sort of them in India, II. 826.  
 Shining Worms in them, II. 826, 827. Large  
 Oysters in Ceylan, V. ii. 181. Concerning the  
 stocking the River Mene with them, VII. iii.  
 420.

## P.

- Painting, I. 686, \* 598. Some Remarks on  
 Painters, V. ii. 7. Painting imitated by  
 Printing, VI. i. 460.  
 Palm-Trees, V. ii. 143.  
 Palpitation of the Diaphragm, VII. iii. 683.  
 Paper of the Antients, VII. iv. 39.  
 Paradox mechanical, VI. i. 310.  
 The Parenchymous Parts of the Body described,  
 III. 17 to 20.  
 Of the Root Pareira Brava, V. 404.  
 Parhelia observed, II. 186 to 188. IV. 227.  
 VI. i. 75, 76, 77, 79, VII. iv. 101.  
 Paris, the Longitude of it, I. 648, \* 560. I.  
 650, \* 562. VI. i. 410.  
 Paris and English Weights compared, VII. iv.  
 46.  
 Paris and London, their Magnitude compared,  
 IV. i. 426.  
 Paroquet, Observations on the Dissection of it,  
 with Figures, II. 855, 856.  
 Thomas Parre, an Account of him, III. 306,  
 307.  
 Partus Cæsareus, it's Operation, V. 195.  
 Patella, a Case commonly mistaken for a Frac-  
 ture of it, VII. iii. 678.  
 Patras, the Latitude of it, I. 652, \* 564.  
 Pavement Roman, near Grantham, VII. iv. 29.  
 Pau, the Longitude and Latitude of it, I. 650,  
 \* 562.  
 Peaches, Observations on their Down, VI. ii.  
 337.

## INDEX.

- Peak in Derbyshire, some Observations on it, VI. ii. 190. Peak's-Hole, VI. ii. 191.  
 Pearl, the Origine of it, II. 827. Pearl-fishing in Ireland, II. 828, 829.  
 Pease, grey, of the Vessels of them, VI. ii. 335.  
 Pebbles transparent, II. 466, 467.  
 Peculiarities both in Men and Brutes, divers Instances of them, III. 287, 288.  
 The Pediculus Ceti described, V. 25.  
 Pekin, the Longitude and Latitude of it, I. 657.  
 \* 569.  
 Pendulum, Synchronism of it's Vibrations in a Cycloid, I. 550, \* 462.  
 Pendulum-Watches, I. 553, \* 465. Pendulum of a Clock, it's Irregularity prevented, VI. i. 297.  
 Pen-Park-Hole in Gloucestershire, II. 370, 371.  
 A strange Pericardium described, III. 69.  
 A Periodical Paisley described, III. 33, 34.  
 Perioleum, Observations on it, VII. iii. 672.  
 A mistaken Perpetual Motion, I. 593, \* 505.  
 VI. i. 323.  
 Persepolis, the Ruins of it, III. 527.  
 A Perspective Instrument, I. 686, \* 598.  
 Pewter-Money coined by the late King James in Ireland, V. ii. 31.  
 Pheasants and Partridges, how to breed them up, II. 852, 853.  
 Of the new Philippine Islands, V. ii. 185, 189.  
 II. 2. Philosophy, the present languid State of it, Phænicopterus, *vid. Flamingo.*  
 Phonics compared with Optics, I. 596, \* 508.  
 The Bononian Phosphorus lost, III. 346. A Phosphorus by Mr Boyle, III. 346. Mr Kunckel's Phosphorus, III. 347. Experiments with the liquid and solid Phosphorus, III. 347 to 350. A Parallel betwixt a Phosphorus and Lightning, III. 350, 351.  
 The Phosphorus Metallorum, III. 682.  
 Pictures, an Examen of them, I. 691, \* 603.  
 A monstrous Pig, II. 900. Two monstrous Pigs, 900, 901.  
 Pilmires, their acid Juice, II. 791.  
 A Pistol-Bullet, crusted over, voided by Urine, III. 164.  
 Pitch, Tar, Rosin, and Turpentine, the way of making them, II. 669.  
 Plague, an Experiment concerning it, III. 274, 275. A Preservative against the Infection of it, 275. Of the Plague at Copenhagen, Ann. 1711, V. 380. Plague at Constantinople, VII. iii. 591. Experiment with the Bile of Persons dead of it, VII. iii. 595. Experiments with the Blood of a Person dead of the Plague, VII. iii. 601.  
 Planets, the Proportion of Light wherewith they are illuminated, I. 280. To find the Aphelia of the Planets directly, I. 253. Of Caffini's Orbit of the Planets, IV. 206. A Solution o Kepler's Problem, IV. 208. Observations on some of the Primary Planets, IV. 318, 329, 336. Planets, the Places of them determined by their Appulses to the fixed Stars, VI. i. 170.  
 Planks, the manner of bending them, by a Sand Heat, VI. i. 467.  
 Plants, how to preserve Specimens of them, II. 623. Of the Parts and Use of the Flower in Plants, IV. ii. 305. A new Genus of Plants, IV. ii. 319. Of the Tastes and Virtues of the Plants of the sweet Class, \*V. 466. Coal-Rianta, V. ii. 121. Plants in Wales, 122. In New-England, 160. Rage-ones found in the Peak in Derbyshire, VI. ii. 333. Observations on their Seeds, VI. ii. 334. In New-England; Observations on them, VI. ii. 341. Their Generation, VI. ii. 345. Their Sap, VI. ii. 352. Bulbous, flower-ing much sooner in the Water than in the Ground, VI. ii. 355. Alpine, their smallnes, VI. ii. 356. How to discover their Virtues, VI. ii. 362. A Botanical Invitation to forward a History of those of Swisserland, VI. ii. 380. From Chelsey Garden, presented to the Royal Society, VI. ii. 381.  
 Plato, the Spot in the Moon observed, 1725, VI. i. 220.  
 The Pleiades observed, I. 245. Occultation of the Pleiades, I. 348. VI. i. 220.  
 Plica Polonica, VII. iii. 495. The Cause of it, VII. iii. 496.  
 Pneumatical Experiments upon Ducks and Vipers, Frogs and Kitlings, II. 215 to 217. Upon several Liquors, and the Mixture of them, and upon several Plants, Fruits, and Flowers, II. 235 to 251. A Pneumatical Experiment of a Bladder included in an exhausted Receiver, II. 251.  
 The Pneumatic Engine applied to Cupping-Glasses, III. 265, 266.  
 Points, Mathematical, of their Proportion to one another, IV. 1.  
 Poisons, Observations on them, II. 814 to 816. Experiments with Poisons on several Animals, V. 38. The Poison of Vipers, III. 596. Poisonous Apparatus of a Rattle-Snake dissected, VII. iii. 416. a poisonous Fish about the Bahama Islands, II. 842. Poison-wood Tree in New-England, VI. ii. 307, 308.  
 The Polarity of Iron, II. 603 to 606.  
 Pole, the Elevation of the Pole, and the Obliquity of the Ecliptic continue unaltered, I. 263.  
 Polypus, the Original of it, III. 57, 58.  
 A Polypus in the Heart, III. 70. The Cause and Nature of a Polypus, III. 71 to 76. A Polypus in the Vena Pulmonalis, and the Structure of that Vessel, V. 219. Polypus coughed up, VII. iii. 503, 504.

Pool's.

- Pool's-hole, VI. ii. 191.  
 Horned Poppy described, II. 642.  
 The Pores of the Skin described, with Figures, III. 9, 10. wholly obstructed by nocturnal Air, III. 10. Pores of Box-Leaves, VI. ii. 337.  
 Porisms of Euclid restored, VI. i. 80  
 Port-Royal in Jamaica, Longitude of it, VI. i. 190.  
 Porpess, Observations on the Anatomy of it, II. 839 to 842. A venomous Scratch with the Tooth of a Porpess, II. 843.  
 Porphyry-Pillars in Egypt, an Account of them, with Figures, III. 528 to 530.  
 Portland, an Account of the Damage that happened there, Feb. 3. 1695 6, III. 649.  
 Potatoes, IV. ii. 299.  
 Pox, it's Antiquity in Europe, VII. iii. 652, 663.  
 Poysen. *See* Poison.  
 The preparing Vessels, an extraordinary Situation of them, III. 191.  
 Universal Primer, an Essay towards it, III. 378.  
 Printing, of it's Invention and Improvements, V. ii. 11 to 26. Printing In Imitation of Painting, VI. i. 469.  
 Projects, the Effects of Gravity on the Motion of Projects, I. 560, \* 472. The Doctrine of Projects, I. 563, \* 475. The Resistance of the Air to the Motion of Projects, I. 572, \* 484.  
 Projectiles, their parabolic Motion, VI. i. 299.  
 An Account of Prusa in Bithynia, and the Observations in Turkey continued, III. 473 to 489.  
 Prussian-Blue prepared, VII. iii. 747. Observations and Experiments of it, VII. iii. 748.  
 Pudenda of a Woman preternaturally formed, VII. iii. 546, 548, 551.  
 A Puerpera dissected, V. 290, 298.  
 Pullies, the Friction of them, VI. i. 322.  
 Vena Pulmonalis, it's Structure, V. 219.  
 Pumice-Stones floating on the Sea, VI. ii. 204. VII. iv. 43.  
 A cheap Pump, I. 633, \* 545.  
 Purgatives, of their Principles, V. 403.  
 The Purple Fish described, II. 823 to 825.  
 A Pyramidal Appearance in the Heavens, IV. ii. 133.  
 The Pyrites and Lapis Calcarius considered, II. 529. The Spontaneous firing of the Pyrites, II. 530.  
 Pyrmont-Waters, of their Virtues and Qualities, IV. ii. 201.

## Q.

- THE Testudo Velliformis Quadrabilis, I. 22.  
 The Quadrable Spaces in a Cycloid, I. 116.

- Quadrant, a new one described, VI. i. 461.  
 A Quadratrix to a Circle, I. 56.  
 Quadratrix to the Hyperbola, IV. 37. *vid.*  
 Curves.  
 The Quadrature of the Parts of Hippocrates's Lunula, I. 27. Quadrature of a Portion of the Epicycloid, I. 31. Quadrature of Figures Geometrically irrational, I. 52. Quadrature of the Logarithmic Curve, I. 56. Quadratures of Figures, IV. 26. A Demonstration of the eleventh Proposition of Sir Isaac Newton's, VI. i. 60. A general one of trinomial and hyperbolical Curves, VI. i. 82.  
 Quarries and Rocks in Austria and Hungary, II. 464.  
 A Quarry of White-Marble in Ireland, II. 464. another sort, IV. ii. 206.  
 Queenborough, a Well opened there, VI. ii. 244.  
 Quicksilver Mines in Friuli, II. 577, 580.  
 Quinces, their Down examined, VI. ii. 337.

## R.

- THE Rail described, II. 853.  
 Rain falling, to measure the Quantity of it, II. 44 to 46. The Rain at Gresham-College, in 1695, 1696, II. 60. at Townley in 1697, 1698. II. 86. The Rain at Townley and Upminster, in 1699, 1700, 1701, 1702, IV. ii. 65. The same in 1703, 1704, 67. The Rain at Upminster, in 1705, IV. ii. 74. at Pisa and Upminster, in 1707, 77, 90. at Zurich and Upminster, in 1708, 77, 93. at Upminster and Paris for 18 Years compared, 100. A freezing Rain in Somersetshire, II. 150. at Oxford, 152. Rain, measured in Northumberland, VI. ii. 57. Effects of a violent Shower of it in Yorkshire, VI. ii. 58. It's Descent accounted for, VI. ii. 61.

- Rainbows observed in France, at London, and at Chester, II. 188, 189. Optical Assertions concerning the Rainbow, II. 194. The Colours and Diameter of the Rainbow from the given Proportional of Refraction; and the contrary, II. 195 to 199. Coloured Arches within the Rainbow, VI. i. 122, 123. An arc of one inverted, VI. ii. 76. One seen on the Ground, VI. ii. 80.

- A Lunar Rainbow in Derbyshire, IV. ii. 132.  
 Rainbows Marine, V. ii. 215.  
 Rat, Observations on the Dissection of it, II. 871.

- Rattle-Snake. *See* Snake.

- The exhausted Receiver, the Production and Growth of Animals in it, II. 227. The Expansion of Blood and other Animal Juices in it, II. 228. Experiments about Snails, Efts, and Leeches in it, II. 232. About creeping and winged Insects, Ants, and Mites, how long they live in it, II. 233, 234.

B

Red.

## INDEX.

**Red-Lead,** VI. ii. 193.

**Refining,** the Art of it, giving an Account of the Separation of all other Bodies from Gold and Silver; 1st, by Parting; 2dly, by the Test; 3dly, by the Almond-Furnace, or the Sweep; and 4thly, by Mercury, II. 591 to 595. Experiments of refining Gold with Antimony, II. 595 to 599.

**The Apertures and Charges of Reflecting Te-**  
**lescopes,** I. 200.

**Reflecting Microscopes,** I. 210.

**Reflecting Telescopes,** I. 210. VI. i. 133.

**To find the Point of Reflection in Speculums,** I. 172.

**The Advantages of Reflection applied to Optic Instruments,** I. 196.

**The Reflective Power of the Superficies of Fluids contiguous to other Fluids,** I. 614, \* 526.

**Refraction of the Air;** astronomical Allowances to be made for it, VI. i. 167. A Table for it, VI. i. 169. Some times greater than at others, VI. ii. 44.

**Maps in Low Relievo,** I. 691, \* 603.

**Remedies suggested against Cold,** III. 639.

**Repton,** an extraordinary human Skeleton found there, VII. iv. 29.

**Resin,** its Quantity in the Cortex Eleutheris, VII. iii. 738.

**Resistance,** of a Solid of the least Resistance, IV. 346, 348. **Resistance of Fluids,** VI. i. 305.

**Respiration,** an Experiment concerning the manner of it, III. 65. The chief Use of it, 67.

**Respiration,** difficult at the Tops of Mountains, II. 226.

**Rey,** a strange sort of it in France, described, II. 625, 626.

**Right Ascension and Declination,** their Differences observed by cross Hairs in a Telescope, VI. i. 165.

**The River Greatah running under Ground,** II. 325. **River-Water recovered after stinking,** II. 326. III. 547. V. ii. 171. **Rivers,** the Rise of several of the most considerable in Europe, VI. ii. 174.

**Hard Rocks,** how to break them, II. 367. VI. ii. 6.

**Rocks,** two strange ones in New-England, V. ii. 164, 165.

**Roman Antiquities in Wiltshire,** V. ii. 31. in Sussex, V. ii. 63. Roman Urns and other Antiquities near York, III. 415, 416. V. ii. 38. A Roman Pottery near Leeds, III. 418. Roman Bricks and Plastering, III. 419. An old Roman Wall and Multangular Tower near York, III. 419, 420. Several Roman Antiquities about York and Leeds, III. 421. Roman Monuments at Adell in Yorkshire, V. ii. 40. A Votive Monument, V. ii. 35. The Vestigia of a Roman

Town at Adell, V. ii. 37. Two Roman Inscriptions at York, proving that the Ninth Legion resided there some time, V. ii. 41. A Roman Coffin, and other Antiquities, and Coins, III. 421, 422. A Leaden Coffin found in a Roman Burying-Place, V. ii. 41. Roman Coins in Yorkshire, V. ii. 33, 34. A Roman Pavement near Roxby in Lincolnshire, III. 422, 423. Another in Sussex, V. ii. 63. and a Roman Bath, 64. A Roman Sudatory at Wroxeter, V. ii. 61. A Roman Altar near Shields in the Bishopric of Durham, III. 423, 424. Two Roman Altars, with their Inscriptions, in Northumberland, III. 424, 425. A Roman Altar at Chester, with its Inscription, III. 425, 426. Roman Inscriptions at Caerleon, V. ii. 43. at Lanchester, 49, 50. Roman Coins in Lincolnshire, IV. ii. 246. Roman Coins found near Nottingham, III. 426. Molds for coining, for counterfeiting Roman Coins, with a Roman Shield, III. 426, 427. The Roman way called High-street in Lincolnshire, III. 428 to 430. Roman Mill Stones in Yorkshire, V. ii. 38. Urns, *ibid.* Roman Camps on the Downs in Sussex, V. ii. 76. Roman Inscription, at Chichester, VII. iv. 23. Pavement near Grantham, *ibid.* 29. Economy of the Roman times near Grantham, VII. iv. 30.

**Roots impossible,** VI. i. 9, 19, 25.

**Roses,** the Longitude and Latitude of it, I. 650, \* 562.

**Rowing Men of War in a Calm,** VI. i. 439.

**Royal-Oak,** an Inscription on it, V. ii. 114.

**A Ruminating Man,** an Account of him, III. 110, 111.

**Runic Inscriptions,** III. 433, 434. A Runic Inscription on the Font at Bridekirk, III. 435.

**Rupture,** an umbilical one, VII. iii. 516.

**Turkish Rusma,** II. 458.

**The Latitude of several Places in Russia,** I. 652, \* 564.

**A Rusty Needle breaking out at the Side,** III. 93.

## S.

**Sable-Mice** described, II. 871, 872.

**Saffron,** the Culture of it, II. 635 to 638. VI. ii. 311. its Flower and Seed-Vessel described, VI. ii. 309.

**A Ship sailing against the Wind,** I. 665, \* 577. Horizontal Sails for Mills, I. 586, \* 498.

**A Salamander** described, II. 816.

**Sal Gemme Mines** in Poland, II. 524.

**A new Salival Duct** discovered and described, III. 58, 59.

**Salt,** the way of making it in France, Lancashire, and Germany, II. 363 to 365. in China, V. ii. 175. Salt-Works at Soowar, VI. ii. 233.

**Salt**

- Salt and Sand formed from Brine, II. 360, 361.  
 Salt-Springs at Hall in Saxony, at Lunenburg, in Dorsetshire, and the Bishoprick of Durham, II. 351. Salt-Springs, and Salt-making at Nantwich in Cheshire, and at Droitwich in Worcester-shire, II. 352 to 360.  
 Salt-Mines in Transilvania and Hungary, II. 523.  
 Natural Salt, a Rock of it in Cheshire, II. 523.  
 Of the Saltiness of the Ocean, V. ii. 216.  
 An odd Salt extracted out of a metallic Substance, III. 325. A Volatile Salt extracted out of all sorts of Plants, III. 326 to 328. No Alcalizate Salt in any Subject before the Action of Fire upon it, III. 328 to 331. No sensible Difference amongst fixed and volatile Salts, and various Spirits, III. 331 to 339. Vegetable Salts extracted, III. 339 to 344. The Quantity of Volatile Acid Salts contained in Acid Spirits, III. 344, 345. Salts, fixed Alkaline, VII. iii. 700, 717. Produced by burning rotten Wood, VII. iii. 727. Cathartic or Epsom, VII. iii. 729, 732.  
 Salvadore, in Brasil, the Latitude of it, I. 658, \* 570.  
 Sands, Schemes of them, II. 451 to 454.  
 A Sand Flood at Downham in Suffolk, II. 455, 456.  
 A black shining Sand from Virginia examined, II. 556, 557. A black Sand from Italy, II. 557.  
 A Sandy Soil manured with Clay, II. 731.  
 Sap, the Circulation of it, 689. The Descent of it in Winter, II. 690. The Motion of Sap, IV. ii. 302. Sap in Plants, VI. ii. 352.  
 Satellites of Jupiter. *See* Jupiter.  
 Saturn observed, I. 367. VI. i. 221, 223. The outermost Satellite of Saturn discovered, *ibid*. The third Satellite of Saturn discovered, I. 369. The two interior Satellites of Saturn discovered, *ibid*. The Theory of the five Satellites of Saturn, I. 370. The Motion of Saturn's Satellites rectified, with Observations on them, IV. 320. Cassini's Tables of their Motions corrected, IV. 323.  
 The Conjunction of Saturn and Jupiter, Ann. 1682, and 1683, I. 389.  
 A Table of the mean Conjunctions of Jupiter and Saturn, I. 398.  
 An Occultation of Saturn, Ann. 1671, I. 347. Ann. 1678, I. 353. Ann. 1687, I. 365.  
 A Transit of the Moon below Saturn, Ann. 1682, I. 357.  
 The Phases of Saturn, Ann. 1665, 1666, 1668, 1670, I. 365. Ann. 1671, I. 366. Ann. 1676, I. 367.  
 Observations on Saturn. *Vide* Collection of Astronomical Observations, IV. 329, 336.
- Saturn, in Conjunction with the Moon, VI. i. 223. The Nature and Manner of forming his Ring, VI. i. 223.  
 A Piece of Saxon Antiquity found in Somersetshire, III. 441, 442. Some Saxon Coins found in Suffolk, III. 436, 437. Some Remarks on them, and an Addition to them, 438 to 441.  
 Scale-Fish, Experiments about it in an exhausted Receiver, II. 220, 221.  
 Scallop, the Anatomy of it, II. 829, 830.  
 Scapula, falling off by a Mortification, VII. iii. 675.  
 Scarabaeus Galateus Pulsator, an Account of it, VII. iii. 407.  
 Scolopendra Marina, II. 833 to 836.  
 A Scorpion devoured by a Rat, V. 43.  
 Scotland, Observations in it by several Persons, III. 538 to 540. V. ii. 123. Medical Observations in Scotland, V. ii. 127.  
 Scythian Lamb, II. 646. VI. ii. 317.  
 Sea, the Depth of it founded without a Line, II. 257 to 260. How to fetch up Water from any Depth of it, II. 260. The Flux and Reflux of the Sea, an Hypothesis about it, II. 268 to 276. Objections against this Hypothesis answered, II. 275 to 278. Animadverions on this Hypothesis answered, II. 279 to 284. Of the Saltiness of the Sea, V. ii. 216. A Machine for measuring its Depth, VI. ii. 163. Sea-Leach, VII. iii. 418.  
 Sea-Water, the different Gravities of it according to the Climates, II. 297. A way to make Sea-Water sweet, *ibid*. Sea-Water made fresh, II. 297, 298.  
 An Inland Sea near Dantzic, yielding a poisonous Substance, II. 320.  
 The Collection of Secants, I. 660, \* 572.  
 Of Secretions in an Animal Body, V. 249.  
 Seeds which clarify Water, II. 646.  
 Seeds, exotic, how to raise them, VI. ii. 353.  
 A strangely self-moving Liquor, III. 367 to 369.  
 The Spanish Sembrador, its Use, II. 738 to 741.  
 Semita Luminosa, of Dr Childrey, VI. i. 216.  
 An antient Sepulchre found in France, and the verbal Process upon the Discovery of it, III. 443 to 446. An antient Sepulchre near Rome, III. 448.  
 Series infinite, IV. 90, 130. Series recurring, VI. i. 51.  
 Serpent, Symptoms attending the Bite of it, a Stone healing it, II. 813, 814. Serpents in Ceylan, V. ii. 179.  
 Seville, the Longitude of it, I. 651, \* 563.  
 A Shell found in the Kidney, III. 162.  
 Shell-Snails, the odd Turn of some of them, II. 822.

Shells,

## INDEX.

- Shells, Land and River Shells found under Ground, IV. ii. 270.  
 Shell-Fish, Experiments about them in an exhausted Receiver, II. 220.  
 Sheep, of Worms found in their Heads, V. 15.  
 Hydatides in a Sheep's Kidney, V. 54. Fetus and Parts of Generation of a Sheep, VII. iii. 445.  
 Shining-Fish, Observations on it, III. 639, and on Shining Flesh, 641 to 645. Shining Wood, and Fish, Experiments concerning the Relation of Light and Air in them, II. 206.  
 Ships to preserve them from being Worm-eaten, I. 684, \* 596. Lead-Sheathings for Ships, *ibid.* Ship-building, I. 676, \* 588. A Method of rowing them in a Calm, VI. i. 439.  
 Sight decayed, an easy help to it, III. 41.  
 Plain Sights rejected, I. 220. Preferred to Telescopic Sights, I. 221. Telescopic Sights invented by Mr Crabtree, IV. 345.  
 Silk, the Nature and Qualities of it, II. 757. How to know the best Silk, and estimate it by Ellay, II. 757. Observations about the ordering of Silk-Worms, II. 756. Of Silk-Worms, V. 18. Of the Silk of Spiders, V. 20.  
 The Silk-Tail described, II. 853.  
 Silver Mines in Hungary, II. 583 to 585. Vegetable Silver, II. 591.  
 Silver-Pine, from the Cape of Good-Hope, II. 672.  
 A Sinking of the Earth in Kent, IV. ii. 248. VI. ii. 203. Part of a Hill sinking down in Ireland, 250. Of the sinking of three Oaks into the Ground in Norfolk, 252.  
 Siphons performing the same things with the Sipho Wurtemburgicus, I. 625, \* 537.  
 Sirius, his Parallax and Magnitude considered, VI. i. 163.  
 Skeleton's Human, petrified, VI. ii. 205. An extraordinary large one, VII. iv. 29.  
 Skin, distempered, VII. iii. 483.  
 Slag-Lead, VI. ii. 193.  
 Slave, the Choice and Charge of it, I. 676, \* 588.  
 Sleep, an extraordinary Sleepy Person, V. 353. Small-Pox of the Inoculation of it, V. 370 to 379. Small-Pox inoculated in New-England, VII. iii. 601. Concerning it, VII. iii. 602, 608, 609. Mortality of it in the natural way, VII. iii. 609. Natural and inoculated compared, VII. iii. 611. The Method of procuring it in South Wales, VII. iii. 618, 619, 620. A remarkable Instance of its Infection, VII. iii. 621. Epidemic at Plymouth, VII. iii. 623. Effects of it at Hastings, VII. iii. 632.  
 Smalt, V. 420. VI. ii. 236.  
 Smelts, their Degeneration, VII. iii. 423.  
 Smoke, an Engine consuming it, III. 638.  
 Rattle-Snake, V. ii. 162. VII. iii. 410. The Anatomy of it, II. 797 to 809. VII. iii. 416. A way of killing it, II. 811. Effects of its Poison, VII. iii. 412.  
 Snake-Root described, II. 644, 645.  
 Snow, an unusual sort of it, II. 148. Red Snow near Geneva, *ibid.* Observations upon Snow, *ibid.* The Nature of Snow, II. 148 to 150. the Figures of it observed, VI. ii. 59. VII. iv. 72.  
 Snow-down Hill, an Account of it, III. 537.  
 Soap-Earth from Smyrna, II. 457, 458.  
 The Solar Numbers corrected, I. 269.  
 A Solid of the least Resistance, IV. 346, 348.  
 Sorbus Pyriflora, II. 652, 653.  
 Sounds, the Swiftnes of Sound, and its Reflection or Echo, I. 594, \* 506. The Doctrine of Sounds, I. 596, \* 508. Experiments on the Motion of Sounds, IV. 396. The Nature and Properties of Sound, IV. 414.  
 Spain, of Insects and Marine Animals there, V. 10.  
 Spar, the Growth of it, and the Formation of Rock-Plants, II. 519 to 523. Spar in the Lead-Mines in Derbyshire, VI. ii. 192.  
 Sparta, the Latitude of it, I. 652, \* 564.  
 Spaw-Waters, an Examen of them, IV. ii. 198.  
 A Speaking Trumpet, I. 593, \* 505.  
 An Instrument for measuring Specific Gravity, 604, \* 516. The Specific Gravity of several Bodies, I. 611, \* 523. VI. i. 329. Of Solids, a Caution in examining it, VI. i. 327. VI. i. 329. Of Tin Crystals, VI. ii. 190.  
 The Aëreal Speculum, I. 172.  
 The Point of Reflexion in a Speculum found several Ways, I. 172.  
 Sperma Ceti, VII. iii. 425.  
 Spermatic Vessels, uncommon Anastomes, VII. iii. 553.  
 The Proportion of Spheres to their containing Cylinders, I. 58.  
 Spica Virginis, VI. i. 218.  
 Spiders, a Table of them found in England, II. 793, 794. Spiders darting their Thread into the Air, and swimming in it, II. 794 to 796. The Innoxiousness of them and Toads, II. 797. They tinge Water of a Sky-Colour, *ibid.* Of the Silk of Spiders, V. 20. Their Venom, VII. iii. 408.  
 Spine Cloven, VII. iii. 676.  
 Spiritus Vini Æthereus, VII. iii. 744.  
 Spittle of an unusual Colour, VII. iii. 583.  
 Spleen, the Texture and Use of it, with Observations about it, and the Liver, III. 84. A diseased Spleen, and a Polypus near it, III. 85. A Bitch with Puppy that had lost the Spleen, II. 904. Human, the Glands of it visible to the naked

- naked Eye, V. 252. Two, and three Spleens in one Body, *ibid.* A large one, VII. iii. 560. Spots in the Sun, Ann. 1660, I. 274. Ann. 1671, *ibid.* Ann. 1676, I. 277. Ann. 1684, I. 279. Ann. 1703, IV. 228. Ann. 1704, 231. From 1703 to 1708, 235. From 1708 to 1711, 240. Mr Crabtree's Opinion of these Spots, 241. Spots in the Sun observed with the naked Eye, VI. ii. 122.
- A Spout at Topsham near Exeter, II. 104. Spouts in the Downs, IV. ii. 103. In the Mediterranean, *ibid.* In Yorkshire, IV. ii. 106. In Lancashire, IV. ii. 108.
- A Spring that is never frozen, II. 335. A burning Spring in Shropshire, IV. ii. 195. The Nature of intermitting and reciprocating Springs, VI. ii. 177.
- A new sort of Stairs, I. 684, \* 596.
- Fixed Stars, how to find the Parallax of them, I. 231. The Distance of them, I. 233. The Places of 23 of the chiefest of them, according to the antient Astronomers, I. 234. The Distances of some of the Chief of the Fixed Stars, as observed by the Antients, I. 243. The Motion of the Fixed Stars, I. 245. The Nebulose Stars discovered, I. 247, 251. Nebulae, or Lucid Spots among the Fixed Stars, IV. 224. The first of Aries, a double Star, I. 247. Changes observed amongst the Fixed Stars, I. 247. The Change of Latitude of some of the Fixed Stars, IV. 225. The Infinity of their Spheres, VI. i. 147. Of the Number, Order, and Light of them, VI. i. 148. A new Motion discovered in them, VI. i. 149. Occultations of several of them, VI. i. 218.
- New Stars, I. 247. A new Star in Collo Cygni IV. 220, 222. A History of the new Stars for the last 150 Years, IV. 222.
- Stars. *Vide* Collection of Astronomical Observations, IV. 329, 336.
- To find the right Ascension and Declination of an unknown Star, I. 62.
- To cast Statues of an extraordinary Bigness, I. 687, \* 599.
- Steel, a new way of making it, II. 560 to 562.
- A Stellar Fish, II. 832, 833.
- A Property of Stereographic Projection demonstrated, I. 665, \* 577.
- Stomach and Guts, the Motion of them, III. 91. Iron, Nails, Lead, &c. found in the Stomach of an Idiot, V. 273. The Stomach of a Horse wounded, and the Cure of it, III. 91. A Knife cut out of the Stomach, *ibid.* Wound in the Stomach, VII. iii. 506. An Impostumation in it, VII. iii. 507. A preternatural Perforation in it, *ibid.* A Stricture in it, dividing it into two Bags, VII. iii. 508.
- Stones in the Gall-Bladder, and conjoined Kidneys, III. 81, 82. A Stone taken from a Woman, III. 149. Many Stones taken from one Bladder, *ibid.* Stones found in the Kidneys, III. 150. A Dissection of one that died of the Stone, V. 284. Large Stones voided by a Woman, III. 150. A Stone taken out of the Bladder weighing thirty-two ounces, two large and oddly shaped Stones found in the Kidneys, and a very great Stone taken out of the Bladder, *ibid.* Stones voided by the Urethra, III. 151. V. 283. A large Stone voided by a Woman, III. 151. An extraordinary Stone found in the Kidney, III. 151, 152. Two Stones lodged 20 Years in the Meatus Urinarius, III. 153. A prodigious Stone in the Bladder weighing about fifty-one Ounces, III. 154. A Stone cut from the Bladder that adhered to it, *ibid.* Several Stones voided by a Boy in Scotland, *ibid.* The Chest discovered, 155. Broken Stones voided, *ibid.* A Stone under the Tongue, 155. V. ii. 160. A Stone in the Glandula Pinealis, 157. Stones found in the Heart and Lungs, 158. Stones found in the Gall-Bladder, Stomach, and Kidney, 159. A Stone voided by Stool, which had obstructed the Ductus Communis Bilarius, V. 274. Stones voided by Siege, III. 160. A Stone grown to an Iron Bodkin in the Bladder, III. 162, 163. A Stone from the Bladder with a Flint in it, 164. A Stone from the Bladder with Hair growing on it, *ibid.* A Stone in the Bladder of a Dog, *ibid.* A Stone fastened to the Back-Bone of a Horse, 164, 165. A Stone taken out of the Belly of a Horse, 165. 166. A Stone in the Bladder of an Ox, 166, 167. A prodigious Number of Stones voided by a Woman at Bern, 167 to 176. Two of these Stones examined, 176, 177. The Production of Stones in Animals, 178 to 181. Comparative Experiments about Stones, 181, 182. Experiments relating to the Cure of the Stone proposed, V. 284. The Generation of the Stone, III. 182. Stones extracted from Women without cutting, with Figures, 182, 185. A large Stone cut from a Woman, *ibid.* A new way of cutting for the Stone, 185, 186. Observations and Experiments concerning this way of Operation, 187, 188. The way of cutting for the Stone in the Kidneys, 188 to 191. Stones taken out of a Horse, VII. iii. 440. Voided per Anum, VII. iii. 520. A new Method for cutting for the Stone, VII. iii. 527. Observations upon Bodies troubled with it, VII. iii. 530. Vast Quantities voided during the Use of the Pyrmont Water, VII. iii. 533. Voided thro' the Urinary Passage, VII. iii. 534. Broken in the Bladder, and voided thro' the Urethra, *ibid.* In the Urethra, VII. iii. 536. Thirty-three taken out of the Bladder by the lateral Operation; Plate XXI. Part III. p. 538.
- Stones in several Animals much esteemed, but of little Use in Physic, III. 315.

## INDEX.

Swallowing of Stones the Cause of a Disease, III. 92. Remarks on it, 93. Prune-Stones breaking out of the Navel, *ibid.* The Mischiefs from swallowing the Stones of Fruit, V. 256 to 261.  
 Stones fit for building, I. 676, \* 588.  
 A blackish Stone in Shropshire, yielding Pitch, Tar, and Oil, II. 459, 460.  
 Stones not grown to Maturity in Scotland, II. 463.  
 A Stone-Quarry near Maestricht, II. 461.  
 Stones growing at the End of a Rush, II. 464.  
 A Skeleton of an Animal impressed in Stone, VII. iv. 272.  
 Stones, several of them regularly figured, II. 507 to 511.  
 A Tincture given to a Stone, I. 692, \* 604.  
 Of a Ball volded by Stool, V. 276.  
 A Storm of Rain at Denbigh, IV. ii. 101. Of Hail in Yorkshire, 109. Of Rain in Yorkshire, VI. ii. 58.  
 Of the great Storm of Wind, Nov. 26, 1703, IV. ii. 109. A strange Effect of it in Sussex, 112. in Holland, *ibid.*  
 Strasburg, the Longitude of it, I. 650, \* 562.  
 Strata, in Fullers-Earth Pits, VI. ii. 220. In Coal-Mines, VI. ii. 222. In Marl-Pits, VI. ii. 224. Of Holt-Wells, VI. ii. 225.  
 Bereights, of the Current there, VI. ii. 171.  
 Styli of the Antients, VII. iv. 39.  
 Colebatch's Styptic, Experiments made with it, III. 255. Eaton's, VII. iii. 563.  
 Styrax Liquida, the way of making it, V. 417.  
 Subterraneous Oaks in Somersetshire, II. 423.  
 Subterraneous Trees in Hatfield-Chace, IV. ii. 212, 218. At Dagenham, 219. In Scotland, 253 to 256. At Reculver-Cliff, 263.  
 A Subterraneous Fire in a Coal-Mine near Newcastle, II. 383, 384.  
 Sugar, an extraordinary Spirit of it, II. 635.  
 The Form of its Salt, V. 353.  
 Sugar, made from the Juice of the Maple-Tree, VI. ii. 379.  
 Sun, the Parallax of it, I. 265, 424. A new way to find its Parallax, IV. 213.  
 Tycho's Equation of the Sun's Orb too great, I. 269.  
 Sun, Eclipses of. *Vide Eclipse.*  
 Mercury observed in the Sun, I. 426.  
 The visible Conjunctions of Mercury and Venus with the Sun, I. 427.  
 The Diameters of the Sun, I. 217.  
 Mock-Suns, and Circular Arches, IV. 227.  
 Surveyor, Marine, VI. i. 444, 456.  
 Surveying, I. 120. A growing Error of Surveys taken with the Magnetical Needle, I. 125.  
 Sussex, of the Site of some Roman Towns there, V. ii. 63.

An Instrument to preserve the exact Symmetry in drawing Faces, I. 686, \* 598.  
 Swallows found in Lakes in the Winter, II. 853.  
 Sweating in hot Turf, VII. iii. 669.  
 Switzerland, of the Icy Mountains, there, V. ii. 152. The Height of its Mountains, VI. ii. 35.

## T.

Tadmore, an Account of it, with many Inscriptions, III. 503 to 518. Remarks upon the Antiquities found at Tadmore, with many Inscriptions, 518 to 526.  
 Tadpoles, the Production of them, II. 818.  
 Tangents to Geometrical Curves, I. 18, 116.  
 A new Method of Tangents, IV. 7.  
 Tangier, some Account of it, III. 458.  
 Tantalus, a Cup so called, VI. ii. 165.  
 Tapestry, weaving, VI. i. 470.  
 Tarantula, an Account of a Person supposed to be stung by it, III. 285, 286.  
 Tartar, the Salt of it volatilized, III. 320 to 325.  
 The Tartarian Lamb described, II. 646. VI. ii. 217.  
 Taste, the Organ of it, III. 58.  
 Tales, Observations on the Clas of Sweet-Tastes in Plants, V. 406 to 417.  
 A new Star in Taurus, I. 253.  
 Teas, three Sorts of it in China, V. ii. 174.  
 New Teeth in two aged Persons, III. 297. after 80 Years of Age, V. 353.  
 Large Teeth (of an Elephant) dug up in Ireland, IV. ii. 236, 237, 244. Large Teeth and Bones in New-England, V. ii. 159. in Northumberland, 47. Teeth of Elephants found under Ground, VI. ii. 205, 211.  
 Telescopes, why a Telescope with four Convex Glasses erects the Objects, I. 189. How Myopes may use Telescopes without Eye-Glasses, IV. 188. The Apertures of Telescopes, I. 191. To measure Distances with a Telescope at one Station, I. 192. Excellent Telescope of several Inventions, I. 193. A new Catadioptric Telescope, I. 197. Apertures and Charges of Reflecting Telescopes, I. 200. An Account of Mr Hadley's reflecting Telescope, VI. i. 133. Right Ascension and Declination observed by cross Hairs in one, VI. ii. 165.  
 Plain Sights preferred to Telescopic, I. 221. Telescopic Sights first used by Mr Crabrie, IV. 345.  
 The Temperature in the Air in America, and its gradual Alteration, II. 42.  
 A Pagan Temple at Cannara in Salset, V. ii. 60.  
 The great Tendon above the Heel, after an entire

- the Division of it, stitched and cured, III. 293, 299.  
 Teneriffe, a Journey to the Pike, V. ii. 147.  
 The Tekes examined, III. 191. The Texture of them explained, III. 192 to 194.  
 The Testudo Veliformis Quadrabilis, I. 22.  
 Thames, an extraordinary high Tide in it, VI. ii. 167. Tides in it observed, VI. ii. 167.  
 Thebes, the Latitude of it, I. 652, \* 564.  
 Thermometer, Elevation of it, VI. ii. 153.  
 Thermometrical Observations, VII. iv. 71, 86, 90.  
 Thermometers, Observations made with them, II. 32, 33. A Thermometer observed at Sea, II. 33. Divisions of the Thermometer ascertained by several Fluids, II. 33 to 36. A new Thermometer, IV. ii. 10.  
 Ductus Thoracicus, a Communication of it, and the inferior Vena Cava, III. 259, 260. Annotations on this Discovery, III. 261, 262.  
 Thorax, a great Quantity of Liquor found in it, III. 76, 77. A Dropsey in it, III. 77. Bony Substance found in it, VII. iii. 505. WarmWater injected into the Thorax of a Bitch, III. 78.  
 Thunder and Lightning, the Causes of them considered, II. 182, 183, 184.  
 Thunder, Accidents by Thunder and Lightning, at Oxford, II. 169 to 172. In Hampshire, 172. At Stralsund in Pomerania, 172, 173. At Dantzig 174. At Portsmouth, *ibid.* At Oundle 175. In the Bay of Biscay; near Aberdeen in Scotland, *ibid.* At Smyrna 176. In Northamptonshire 177, 178. In Yorkshire 179. In Ireland, IV. ii. 126. At Ipswich 128. At Colchester 129. In Devonshire 131. *See* Lightning.  
 Thunder and Lightning, the Direction of Ship-Compasses changed by Thunder and Lightning, II. 180. V. ii. 163.  
 Tides, Directions for observing them, II. 260, 261. Tides observed at London, II. 261, 262. at Dublin, 263, 264. near Plymouth, 264, 265. in Hong-Road, four Miles from Bristol, 265 to 267. at Chepstow, 267. in France 267, 268. at Bermudas, 268. Annual Tides in several Places in England, the Variety of them considered, II. 278, 279. Sir Isaac Newton's new Theory of Tides explained by Dr Halley, II. 285 to 288. Extraordinary Tides about the Orkneys, 290. and in the West Isles of Scotland, 291. at Tunqueen, 292 to 295. A Theory of the Tide at Tunqueen, 295, 296.  
 Timber, the best Season for felling it for Ships, I. 677, \* 589. The Difference of Timber in several Countries, and felled at different Seasons, I. 680, \* 592.  
 Time, to find the apparent Time at Sea, I. 640, \* 552.  
 Tin-Mines in Devon and Cornwall, II. 565.  
 How the Tin Diggers train a Load, II. 566, 567.  
 How they dig the Ore, 567 to 569. How they dress the Tin, 569, 570. Blowing of Tin, 571. Where to find the Stone from which Tin is wrought, 572, 573.  
 Tin Plates, how made, VI. ii. 240.  
 Tobacco, how cultivated in Virginia, &c. III. 574, 582. In Cellan, IV. ii. 312.  
 Tornadoes, V. ii. 171.  
 Tortoise, Observations on it, II. 825. One that lived three Days without a Head, II. 826.  
 The Anatomy of the Heart of a Land-Tortoise, V. 74.  
 Toulon, Latitude of it, VI. i. 421. Longitude, VI. i. 413.  
 Townley in Lancashire, the Longitude and Latitude of it, I. 648, \* 560.  
 Trade Winds, the Cause of them, II. 129.  
 Tredagh in Ireland, the Latitude of it, I. 648, \* 560.  
 Tree, the Communication of the Parts of it with the Parts of the Fruit, II. 710 to 712.  
 Trigonometry, I. 120. Conic Sections applied to Trigonometry, I. 62.  
 Trochitæ and Entrochi described, II. 493 to 503.  
 Tropical Signs, to find the Sun's Ingress into them, I. 266.  
 Truffles described, II. 624, 625.  
 Trumpet, the Speaking-Trumpet, I. 593, \* 505. Defects of the Trumpet, and Trumpet Marine, I. 695, \* 607.  
 Antient Trumpets found in Ireland, V. ii. 109.  
 Tubæ Fallopiæ impermeable, V. ii. 266.  
 Tuhhfat Ilkibar, a Book printed at Constantinople; an Account of it, VII. iv. 1.  
 Tumours, one in the Neck, with a Bony Substance, V. 211. Another full of Hydatides, 214. A schirrous one on the Breast, 216. Another, 218. A large one on the Thigh, V. 388. A prodigious one of the Eye, VII. iii. 404. An extraordinary one of the Abdomen, VII. iii. 422. One in the Loins of a Child, VII. iii. 560. Uncommon ones, VII. iii. 666. One on the Loins of an Infant attended with a cloven Spine, VII. iii. 676.  
 Tunis, a Geographical Description and Map of it, VI. i. 423.  
 Turkey, Observations on it, III. 605.  
 Turnips, of their great and speedy Vegetation, IV. ii. 314.  
 Twins, monstrous, VII. iii. 688.

## U.

- U**Mbilical Rupture, VII. iii. 516.  
 Under-Currents in the Downs, at the Straights-Mouth, and in the Baltic, II. 288, 289.  
 Upper

## INDEX.

- Upper Egypt, Observations upon it, III. 527, 528.  
 Utaniburg, the Longitude of it, I. 651, \* 563.  
 Ureters, four of them in an Infant, III. 146.  
 One of the Ureters distended, V. ii. 266.  
 Urethra, a large Stone in it, VII. iii. 536.  
 Urinary Passages, Insects voided thro' them, VII. iii. 539. Preternatural Confirmation of them, VII. iii. 540.  
 Urine, of a Passage of the Urine to the Bladder, distinct from the Ureters, III. 147. V. ii. 264. Suppressions of Urine (not caused by the Stone) cured by Acids, III. 148. Several solid Bodies voided with the Urine, V. 281. Of one that lived seventeen Years without making any Urine, V. ii. 115. Of a Boy who voided Urine by the Navel, V. 283. A Suppression of Urine, VII. iii. 540.  
 Urns, &c. in Ireland, V. ii. 95. In Norfolk, 97.  
 Uterus, the Structure of it described, III. 197 to 205. A Dissection of the Uterus of a Puerpera, V. 290. Balls of Hair taken from the Uterus and Ovaria, V. 295.

## V.

**V**acuum, Experiments of Pendulums in Vacuo, IV. ii. 168. Gunpowder fired in Vacuo, IV. ii. 171, 172. The Descent of Malt-Dust in Vacuo, 173. Experiments proving an interspersed Vacuum, 173. Vacuum interspersed, Experiment to prove one, VI. ii. 157. Vide Air, Pneumatical Experiments, exhausted Receiver.

Vapours, their Rise accounted for, VI. ii. 61.

Variation, an Error in Surveys taken with Magnetic Needles from their Variation, I. 125. To find the Variation of the Compass at Sea, I. 672, 673, \* 584, 585. The Variation at Paraiba, IV. 453. In the Atlantic and Æthiopic Oceans, IV. 456. Variation at New-York, VI. i. 410. From Java-Head to St Helens, VI. i. 421. From London to Hudson's-Bay, VI. ii. 297, 300. At Vera Cruz, VII. iv. 102. In the Baltic, VI. ii. 285. In the South-Sea, VI. ii. 286. In the Æthiopic Ocean, VI. ii. 289. Of the Needle at London, VI. i. 410. VI. ii. 290.

To make China Varnishes, I. 690, \* 602. III. 619. The Effects of the Indian Varnish, V. 417.

The Vasa Testicularia of a Beetle, II. 782.

Vegetable Statics, an Account of a Book, VI. ii. 157. Vegetables, their anatomical Preparation, VI. ii. 538.

Vegetable Excrescencies, Observations about them, and the Insects bred in them, II. 763.

Vegetation, Observations concerning it, II. 712, 713. Thoughts and Experiments about it,

II. 713 to 718. Reflections on those Experiments, 719 to 728. Experiments on it, IV. ii. 310. The speedy Vegetation of Turnips, IV. ii. 311.

Vegetation, and the running of the Sap, Experiments and Observations about them, II. 673 to 689.

Veins in Plants observed, 691 to 696.

Veins of a Dog, Liquors injected into them, and the Effects, III. 222. Mercury injected into the Veins of Dogs, III. 223. Medicated Liquors, and Medicines injected into human Veins, III. 224.

The Arterious Vein, wanting in some Animals that have Lungs, III. 256.

Veins and Arteries, Schemes of them explained, with several Anatomical and Chirurgical Observations, V. 328.

Venereal Disease, of its Antiquity, V. 381. VII. iii. 652, 663.

Venom of Spiders, VII. iii. 408.

Venus, a Transit of the Moon above Venus, Ann. 1670, I. 347. Spots in Venus, I. 425. The Rotation of Venus, *ibid.* Observations of Venus, I. 426. VI. i. 253. The visible Conjunction of Venus with the Sun, I. 427. The Cause of Venus's appearing in the Day-time for several Days together, IV. 300. Venus, a Conjunction of her and the Moon, VI. i. 253.

Vera Cruz, Longitude and Latitude of it, VI. i. 177.

Versailles, the Aqueduct there, I. 682, \* 594.

Vesuvius, Eruptions of it, Ann. 1707, IV. ii. 207. Ann. 1717, 209. VI. ii. 199.

Vetter, Observables in the Lake Vetter, in Sweden, IV. ii. 183.

The Synchronism of Vibrations in a Cycloid, I. 550, \* 462.

Villi of the Stomach of Oxen, VII. iii. 441.

Vinegar, the way of making it in France, II. 657, 658.

A new Tuning of the Lyra-Viol, I. 706, \* 618.

Vipers, and Snakes, the way of breeding them, II. 811. Experiments made with Vipers, II. 811 to 813. Of the Poison of Vipers, III. 596. Observations on them, VII. iii. 409.

Virginia, the Advantage of it for building Ships, III. 566 to 575. A Voyage to it, and a farther Account of it, III. 575 to 600.

Vision, a Duplicity of it, and a Gutta Serena after great Pains in the Head, and Convulsive Fits, III. 39.

Vitriol, the Oil of it increasing in Weight, II. 534 to 537. White Vitriol, II. 537, 538. Experiments about Vitriol, Sulphur, and Allium, II. 541 to 548.

Vitriolate Water, some Effects of it, II. 328.

A Viviparous Fly, II. 787.

Vomiting

Vines, a new way of cultivating them, II. 656.

Vomiting of Blood cured, VII. iii. 508.

A Voyage from Venice to Smyrna, III. 451 to 456. From England to Constantinople, with Observations made in them, III. 456 to 465. A Voyage of some English Merchants at Aleppo to Tadmor, III. 492, 493. A Voyage from England to the Charibbee Islands, with Observations upon it, III. 546 to 557. The Observations continued, and some of them considered, III. 559.

## W.

**W**ales, Observables in a Journey thro' it, V. ii. 117 to 123.

Walnut-tree, a new kind, IV. ii. 323.

Wasps, their Sexes, VII. iii. 404.

Exact portable Watches, I. 553, \* 465.

Watch, the monthly Variation of one, VI. ii. 153.

Longitudes by Pendulum-Watches, I. 635,

\* 547.

Water, four Men living on it without Food 24 Days, III. 110.

Water, an Experiment of the Evaporation of it, with an Estimate of the Quantity of Water arising by Vapour out of the Sea, II. 108 to 110. The Evaporation of Water in a close Room at Gresham-College, and the different Quantities of it arising in the several Months of the Year, II. 110 to 113.

Optic Len's of Water, I. 195. Water-Microscopes, I. 209. The refractive Power of Water compared with that of Air, I. 230.

The Weight of Water in Water, I. 608, \* 521. The Pressure of Water in great Depths, I. 609, \* 522. Considerations concerning raising Water to any Height, I. 625, \* 537. A new way of raising Water, applied to several Uses, and Objections answered, I. 627, \* 539. Water raised by the Help of Fire, I. 632, \* 544.

Of the Ascent of Water between two Glass Planes, IV. 423. The Cause of the Ascent and Suspension of Water in Capillary Tubes, *ibid.* The Action of Glass Tubes on Water and Quicksilver, 428.

Of the Motion of running Waters, IV. 436. VI. i. 341.

Water sinking, and recovering it's Sweetness, II. 326. III. 547. V. ii. 171.

Water, the running of it in Pipes, VI. i. 347. An Addition to the Description of the Art of living under Water, VI. i. 350. Raised by Help of Quicksilver VI. i. 352. Waterworks at London-Bridge described, VI. i. 358. Electricity of it, VI. ii. 22. Freezing in Vacuo, Experiments on it, VI. ii. 51. Freezing almost instantaneously

VI. ii. 54. It's rising and falling accounted for, VI. ii. 165. Laurel, poisonous, VI. ii. 365. An Antidote to it, VI. ii. 374. Experiments concerning it's poisonous Quality, VI. ii. 374. Cold, it's Use in Fevers, VII. iii. 635.

Watry Vapours, the Circulation of them, II. 126 to 129.

Weather, Observations upon it in Ireland, II. 43. In a Voyage to Hudson's Bay, VI. ii. 55. The History of it at Oxford in 1684, II. 46 to 53. At Cape Corse in 1686, 1687, II. 53 to 60. At Upminster in Essex in 1697, II. 61 to 73. In 1698, 73 to 86. At Emuy in China, in 1698, 1699, II. 86 to 90. At Upminster in 1699, II. 90 to 102. In a Voyage to China, IV. ii. 18. At Chufan in China, IV. ii. 27. At Oates in Essex 1692, IV. ii. 48. At Upminster in Essex, for 1699, 1700, 1701, 1702, IV. ii. 62 to 67. At Upminster, for 1703, 1704, IV. ii. 67. At Upminster in 1705, IV. ii. 74 to 77. At Upminster, Zurich, and Pisa, for 1707, 1708, IV. ii. 77 to 100.

An Engine to weave Linnen-Cloth, I. 589, \* 501. Weaving Tapestry, VI. i. 470.

Tycho Brahe's Observatory in the Island Ween I. 216. V. ii. 132.

A Maps of Weigats, and Nova Zembla, I. 659, \* 571.

The Weight of several Bodies, I. 610, \* 522. The comparative Weight of several Bodies, I. 611, \* 523. The different Weight of several Fluids in Winter and Summer, I. 614, \* 526. Weights, Paris and English compared, VII. iv. 46.

A strange Well and some Antiquities found in Kirbythore, III. 430 to 433.

Wells of fresh Water near the Seas, at Bermudas, II. 298. How to examine the Freshness of it, II. 298 to 304. An ebbing Well in Westphalia, II. 305. Another near Torbay, *ibid.* Another in Derbyshire, VI. ii. 191. A Well taking Fire at a Candle, II. 382. Buxton Well, VI. ii. 191. One near Queenborough, VI. ii. 244.

A large Wen cut off the Cheek, V. 215.

West-Barbary, Observations in it, from Cape-Spartel to Cape-Geer, III. 626 to 631.

The West-Indian way of dressing Buck and Doe-Skins, III. 661.

Whales, and Whale-Fishing about Bermudas, II. 842 to 845.

Whales, a natural History of them, VII. iii. 424.

High Wheels, the Advantages of them experimented, I. 591, \* 503.

Whelp, an Animal resembling it, voided *per* Anum, by a Male Greyhound, II. 904.

- The Contrivance of Whispering-Places, I. 597.  
 \* 509.  
 The Wild-Goose described, II. 849.  
 Winds, the Cause of them, and the Influence they have upon the Weather in most Parts of the World, II. 129 to 141.  
 Wind produced by the Fall of Water, I. 586,  
 \* 498.  
 Wind Pipe, and Lungs of Animals, Grafts found in them, II. 869.  
 Wine, Observation on the Globules in it's Lees, VII. iii. 563.  
 Witney, a Roman Town, V. ii. 99.  
 Of one that could neither Write nor read, yet could cast up Sums, VI. ii. 210.  
 Wologda in Russia, the Latitude of it, I. 652,  
 \* 564.  
 Wolves, Worms in their Kidney, VII. iii. 456.  
 Wood found under Ground in Lincolnshire, II. 423. Fossil-Wood near York, II. 423, 424. In Craven 424, 425. *Vids* Subterraneous Trees.  
 Wood found in Stone, II. 425.  
 Wood, Vessels in it observed, VI. ii. 336.  
 The Wood-Cracker described, II. 853.  
 Wood-Pecker, the Structure of it's Tongue, V.  
 55.  
 Wooden-Horse of the Ancients, VII. iv. 31.  
 World, a Proposal to find it's Age, V. ii. 216.
- Worms, a Remedy for them in Children, III. 133. A Worm voided by Urine, III. 135. Worms found in several Parts of the Body, an Account of them, III. 137, 138. The long Worm in the Flesh in the East Indies, III. 138. Worms found in the Head of Sheep, V. 15. Worms, a kind of them eating out Stones, II. 787. Others eating out Mortar, II. 788. In the Kidneys of Wolves, VII. iii. 456. Worms, *Vids* Lumbrici. Wostack in Russia, the Latitude of it, I. 652,  
 \* 564.  
 Wroxeter; a Roman Sudatory discovered there V. ii. 61.

## Y.

- Y Ale-College, Latitude and Longitude of it, VI. i. 414.  
 Yereflaw in Russia, the Latitude of it, I. 652,  
 \* 564.  
 New-York, Latitude of it, VI. i. 414. Longitude, VI. i. 409, 412.

## Z.

- Z Description of Nova Zembla and Weights,  
 I. 659, \* 570.  
 Zirchnitier-Sea in Carniola described, II. 306 to 317.

AN ALPHABETICAL  
INDEX  
OF THE  
NAMES of the AUTHORS.

**M** R. E. A. III. 526.  
 Mr R. A. I. 539. III. 379.  
 David Abercromby, M. D. III.  
 22. 225.  
 M. Acarete, III. 634.  
 F. Christopher d'Acugna, III. 634.  
 Dr Archibald Adams, IV. 203. V. 34. 204,  
 210.  
 William Aglionby, Esq; F. R. S. II. 757.  
 Albatenius, I. 454.  
 Alhazen, I. 172.  
 M. Didier l'Alleman, Master Watch-maker at  
 Paris, I. 216.  
 Benjamin Allen, M. B. II. 366, 769, 785, 837.  
 III. 311.  
 Thomas Allen, M. D. F. R. S. III. 305.  
 M. J. B. Alliot, Conseiller du Roy, Medecin  
 Ordinaire de sa Majeste, & de la Bastile, III.  
 223.  
 Johannes Baptista Alprunus, M. D. and Physi-  
 cian of the Household to the Empress Eleonora,  
 III. 274.  
 Claudio Amyand, Esq; F. R. S. V. 202, 273,  
 388. VII. iii. 508, 516, 540.  
 Mr Robert Anderson, I. 119.  
 Monsieur St. Andre, V. 266.  
 F. Stephanus de Angelis, a Venetian, I. 118.  
 Bartholomew Anhorn ab Hartuiss. VII. iii.  
 525.  
 Don Anthelm Carthusian of Dijon, I. 456.  
 Apicius Cælius, V. ii. 267.  
 Apollonius Perg. I. 117.  
 John Arbuthnot, M. D. F. R. S. V. ii. 240.

Archimedes, I. 117.

**E**RASMI *Colloquias selecta decem*: Or, Ten select Colloquies of Erasmus. Disposed in the following manner. I. The original Text, printed by itself, from the best and most correct Edition. II. An English Translation, as literal as possible, disposed in that easy Method of the common construing Book to *Lip's Grammar*. For the Use of young Scholars. By NATHAN BAILEY, 12mo.

The Doctrine of the most Holy and Ever-blessed TRINITY, briefly stated and proved, with the Objections against it answered: In a summary View of the whole Controversy. As it was delivered in the Cathedral Church of St Paul, at the Lady *Mayer's Lectures*, in the Years 1729 and 1730. By JOSEPH TRAPP, D. D. and Minister of the United Parishes of Christ-Church and St Leonard in Fister-Lane, 8vo.

*Fundamenta Grammaticis*: Or, the Foundation of the Latin Tongue, in two Parts. By NICHOLAS FARMBOROUGH. The Seventh Edition. Revised by N. BAILEY, 12mo.

The Art of English Poetry: Containing, I. Rules for making Verses. II. A Collection of the most natural, agreeable, and sublime Thoughts, viz. Allusions, Similes, Descriptions, and Characters of Persons and Things, that are to be found in the best English Poets. III. A Dictionary of Rhymes. By EDWARD BYSSHE, Gent. The Seventh Edition, corrected and enlarged, 2 Vols. 12mo.

M. J. Justini ex Trogi Pompeii Historiis Externis Libri XLIV. Quam diligentissime ex variorum exemplorum collatione recensiti & castigati. To which is added, the Words of JUSTIN disposed in a grammatical or natural Order, in one Column, so as to answer, as near as can be, Word for Word, to

the English Version, as literal as possible in the other. Designed for the easy and expeditious learning of JUSTIN, by those of the meanest Capacity, with Pleasure to the Learner, and without Fatigue to the Teacher. With Chronological Tables accommodated to JUSTIN's History. And also an Index of Words, Phrases, and most remarkable Things. For the Use of Schools. By N. BAILEY,

A Treatise of continual Fevers: In Four Parts. To which are added, Medicinal Observations; in Three Books. Wherein are enumerated, The Diagnostics, Prognostics, and Eventa of the several Diseases incident to human Bodies. By JODOCUS LOMMIUS. Translated from the Latin by THOMAS DALE, M. D.

OGLIBY's and MORGAN's Pocket-Book of the Roads, with their computed and measured Distances, and the Distinction of Market and Post-Towns. To which is added several Roads, and above five hundred Market-Towns; A Table for the ready finding any Road, City, or Market-Town, and their Distance from London; A Sheet Map of England, fitted to bind with the Book; And an exact Table of all the Fairs, both Fixed and Moveable in Alphabetical Order, shewing the Days on which they are held. By WILLIAM MORGAN, Cosmographer to their late Majesties. The Seventh Edition.

The Feasts and Fasts of the Church of England: The Reasons and Grounds of their Celebration: With Practical Meditations upon the several Days, concluding each distinct Hour with suitable Prayers, and the proper Collects of the Church. To which is added, An Appendix, wherein the three grand Solemnities, added to the Liturgy of the Church of England, are clearly explained. Illustrated with many new and curious Copper-Plates.
